STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers

FROM: Gregory Wade, City Manager

MEETING DATE: January 13, 2021

ORIGINATING DEPT: City Clerk's Department

SUBJECT: 2021 City Council Meeting Schedule Planning

BACKGROUND:

Pursuant to Solana Beach Municipal Code Section 2.04.070, the City Council shall hold Regular meetings in the Council Chambers of City Hall, on a day and time set by resolution. Pursuant to Resolution 2005-019, regularly scheduled meetings are established for the second (2nd) and fourth (4th) Wednesdays of each month. Historically, certain meeting dates that may conflict with official holidays have been cancelled and a short summer break has been observed. Special Meetings may be scheduled to maintain the consistency needed to sustain City operations.

The purpose of this Staff Report is for Council to review potential holidays, breaks, and possible Special Meeting dates and to establish the 2021 Council Meeting schedule.

DISCUSSION:

The City Council's anticipated 2021 Regular Meeting schedule is included in Attachment 1 and includes potential conflicts to consider for possible meeting cancellations or, if needed, to establish additional meetings. Consideration of the annual meeting schedule for the purpose of possible modifications facilitates preparation of an anticipated agenda schedule. Additionally, memorializing a plan allows:

- Adequate time for Staff to prepare Staff Reports and a final agenda packet on time.
- Adequate preparation time for Council to review the agenda.
- Sufficient time for public notification of any cancelled/rescheduled meetings.

Therefore, this item is intended to review and consider potential modifications of the regularly scheduled 2021 City Council meeting schedule. Any meeting that may be cancelled and rescheduled at this time for planning purposes is not permanent. If a Regular Meeting date is cancelled at this time, it is not permanently cancelled and may

CITY COUNCIL ACTION:		

still take place at its *regularly scheduled* date/time/place, per proper noticing requirements.

Regularly scheduled meetings are intended to provide consistency and to meet the public's general expectations. There are specific noticing requirements for Regular and Special Meeting agendas.

Meeting Types	Agenda Noticing Requirement
Regular Meetings (established by Resolution)	72 hours prior to meeting time.
Special Meetings (called at any time)	24 hours prior to meeting time.

Specific City business, such as the adoption of Ordinances, is required to take place only at a Regular Council Meeting. Therefore, the anticipation of cancelled meetings is necessary to appropriately coordinate meeting agendas, and related business, in order to effectively manage City operations.

Staff recommends that the Council consider potential schedule conflicts, review proposed recommendations, and, if necessary, provide direction to Staff to prepare a revised calendar for reference and planning.

STAFF REPORT CITY OF SOLANA BEACH/SOLANA BEACH SUCCESSOR AGENCY

TO: Honorable Mayor/Chair and City Councilmembers/Directors

FROM: Gregory Wade, City Manager/Executive Director

MEETING DATE: January 13, 2021

ORIGINATING DEPT: Finance

SUBJECT: Consideration of Resolution SA-027 Approving the

Administrative Budget and Resolution SA-028 Approving the Recognized Obligation Payment Schedule (ROPS)

Both for the Period July 1, 2021 to June 30, 2022

BACKGROUND:

As of February 1, 2012, the Solana Beach Redevelopment Agency (the "Agency") was dissolved pursuant to Assembly Bill (AB) 1x26, which was found to be constitutional by the California Supreme Court in its decision in the *California Redevelopment Association v. Matosantos* case. Prior to the dissolution of the Agency, on January 11, 2012, the City Council adopted Resolution 2012-011, electing to become the Successor Agency (SA) to the Agency. Included as part of this legislation was the formation of a Countywide Oversight Board (OB) to replace all local Oversight Boards for each city's SA to be effective July 1, 2016. However, Senate Bill (SB) 107 delayed the formation of this Countywide OB until July 1, 2018.

On June 27, 2012, as part of the Fiscal Year (FY) 2012/13 State budget package, the Legislature passed, and the Governor signed, AB 1484, the primary purpose of which was to make technical and substantive amendments to AB 1x26, and SB 107 (collectively referred to as the "Dissolution Laws"), based on experience at the State and local level in implementing that AB 1x26. AB 1484 made several changes to the process and timing for preparation and approval of a SA's Recognized Obligation Payment Schedule (ROPS). The ROPS sets forth the payment amounts needed for the SA to meet its outstanding enforceable obligations for each fiscal year period until all outstanding debt and obligations are paid.

As part of the FY 2015/16 State budget package, the Legislature passed Senate Bill (SB) 107. As a budget "trailer bill", SB 107 took immediate effect upon signature by the Governor on September 22, 2015. The primary purpose of SB 107 was to make technical and substantive amendments to the existing Dissolution Laws including

SUCCESSOR AGENCY ACTION:	
	_

requiring an annual rather than a biannual ROPS and new administrative cost allocation formulas.

This item is before the City Council, in its capacity as the SA, for consideration of Resolution SA-027 (Attachment 1) approving the SA's Administrative Budget for the period of July 1, 2021 to June 30, 2022 and Resolution SA-028 (Attachment 2) approving the ROPS 21-22 for the period of July 1, 2021 to June 30, 2022.

DISCUSSION:

Recognized Obligation Payment Schedule (ROPS)

As noted above, the ROPS sets forth the payment amounts needed for the SA to meet its outstanding enforceable obligations for each fiscal year period until all outstanding debt and obligations are paid. The ROPS 21-22 will cover the twelve-month enforceable obligation payment cycle under the Dissolution Laws and will control distributions from the Redevelopment Property Tax Trust Fund ("RPTTF") to pay enforceable obligations during the period from July 2021 through June 2022. The enforceable obligations in Solana Beach consist primarily of bond payments (which includes \$200,810 in bond debt service and \$7,700 in related fees) and payments for legal services for the "The Affordable Housing Coalition of San Diego v Sandoval, et al" and "San Diego County Board of Education (SDCBofE), et al vs Sandoval, et al" cases (which totals \$40,000). For the ROPS 21-22 period, enforceable obligations for which RPTTF will be requested totals \$299,385.

The ROPS 21-22 must be prepared on a template form released by the DOF and must be approved by the SA's Oversight Board and transmitted to the DOF and other specified recipients by February 1, 2021. As previously noted, beginning with the ROPS 19-20, there is one Countywide Oversight Board as opposed to individual Oversight Boards for each successor agency. The DOF must approve or disapprove the various enforceable obligations (including payment amounts and funding sources) set forth on an oversight board-approved ROPS 21-22 by April 15, 2021. If necessary, the SA then has five (5) business days to request a "meet and confer" session with the DOF to seek reconsideration by the DOF of any disputed enforceable obligation items.

The DOF meet and confers will generally occur within the following 30-day period, with the DOF required to provide its final determination on ROPS 21-22 enforceable obligations by May 15, 2021 (15 days prior to the next RPTTF distribution). The ROPS 21-22 preparation and approval process will culminate this year with a June 1, 2021 distribution to the SA of RPTTF funds by each county auditor-controller to cover specified administrative costs and for payment of upcoming enforceable obligations during July 2021 through June 2022, along with RPTTF pass-through payments and the distribution of any remaining residual RPTTF funds to other affected taxing entities.

The ROPS 21-22 will be submitted to the Oversight Board for approval at their regular meeting on January 21, 2021, with a subsequent submission to the DOF by the February 1, 2020 deadline.

The ROPS 21-22 (Attachment 3) consists entirely of items included on ROPS 20-21 and previously approved by the DOF.

If necessary, pursuant to SB 107, the annual ROPS can only be amended once and no later than October 1st of a given fiscal year.

Successor Agency Administrative Budget and Administrative Cost Allowance

Pursuant to the Dissolution Laws, the SA must also prepare an Administrative Budget (Attachment 4) for the fiscal year for approval by the Oversight Board. Before the passage of SB 107, the SA was entitled to an Administrative Cost Allowance for a fiscal year equal to the greater of \$250,000 or 3% of the RPTTF received by the SA from the County Auditor-Controller to make enforceable obligation payments during the fiscal year. In the case of Solana Beach, prior to the passage of SB 107, the SA typically received \$250,000 annually or \$125,000 for each six-month ROPS period.

Beginning July 1, 2016, the Administrative Cost Allowance is the greater of \$250,000 or up to 3% of the actual RPTTF distributed to the successor agency in the preceding fiscal year, reduced by the successor agency's Administrative Cost Allowance. However, in no case can the Administrative Cost Allowance exceed 50% of the total RPTTF to pay enforceable obligations in the preceding fiscal year, reduced by administrative costs paid for by RPTTF. In Solana Beach, under the 50% formula, the maximum Administrative Cost Allowance would be \$63,453 for the upcoming ROPS period. Last year, or FY 2020/21, the City was eligible to receive \$63,255 but requested only \$46,500 based on projected SA administrative expenditures.

The Administrative Cost Allowance calculation for the period of July 1, 2021 to June 30, 2022, using the criteria in the paragraph above, is shown in the Administrative Cost Allowance (ACA) for ROPS 21-22 table in Attachment 5.

This Administrative Budget must include:

- Estimated amounts for SA administrative costs for the upcoming two six-month periods.
- Proposed sources of payment for such administrative costs, which may include the Administrative Cost Allowance described below, as well as other eligible sources available to the SA.
- Proposals for arrangements for administrative/operations services to be provided to the SA by the Sponsoring Community or other entity.

The Administrative Budget for the period of July 1, 2021 to June 30, 2022 is prepared in conjunction with the ROPS for the same time period. Though the SA can request up to \$63,453 as an Administrative Cost Allowance, the SA is requesting an amount of \$50,875 for the Administrative Budget for July 1, 2021 to June 30, 2022. The Administrative Budget includes \$28,700 for staff salary and benefits to reimburse the City of Solana Beach (City) for staff work, \$13,000 for legal and audit professional services, \$2,000 for materials and supplies, and \$7,175 for related costs based on the

City's cost allocation plan that are based on a City-wide allocation of staff salary and benefits.

The requested Administrative Budget amount of \$50,875 for FY 2021/22 is greater than the \$46,500 amount requested in FY 2020/21 primarily due to increased contracted professional services costs.

The Administrative Budget will also be submitted to the Oversight Board for approval at a regular meeting on January 21, 2021. The administrative budget is no longer required to be submitted to the DOF for their approval.

CEQA COMPLIANCE STATEMENT:

Not a project as defined by CEQA.

FISCAL IMPACT:

For the ROPS 21-22 period, enforceable obligations for which RPTTF will be requested totals \$299,385. This amount includes \$200,810 of bond debt service payments, \$7,700 of bond-related fees, and \$40,000 of Dissolution Laws Litigation costs. RPTTF reserves are being requested to pay for enforceable obligations in the amount of \$28,184. The administrative Cost Allowance requested is \$50,875.

BACKGROUND:

The San Diego Association of Governments (SANDAG) is required by state and federal laws to develop and adopt a Regional Transportation Improvement Program (RTIP) every two years. The RTIP is a multi-year program of proposed major highway, arterial, transit, and bikeway projects including the *TransNet* Program of Projects. The current 2018 RTIP was adopted by the SANDAG Board on September 28, 2018 and covers the five-year fiscal period 2018/19 through 2022/23. The RTIP includes projects funded by the 2004 Proposition A (TransNet Extension).

This item is before the City Council to consider adoption of Resolution No. 2021-001 (Attachment 1) which would transfer funds to a current ongoing TransNet-funded project from a completed TransNet-funded Capital Improvement Project.

DISCUSSION:

The Glencrest Street Improvement Project (SANDAG MPO ID SB20) was completed and closed in Fiscal Year 2019/20 subsequent to the adoption of the current 5-year RTIP. The project has a positive balance of \$590 in the TransNet Account. The proposed transfer will move the \$590 from the Glencrest Street Improvement account into the Pavement Resurfacing Project (SANDAG MPO ID SB16), an ongoing project annually funded through 2023.

CEQA COMPLIANCE STATEMENT

Transfer of funding between projects is not a project under CEQA. Environmental review will be addressed prior to City Council approval to advertise construction bids for each of the other projects listed in the RTIP.

CITY COUNCIL ACTION:

The Staff recommended transfer of \$590 of TransNet funds from the Glencrest Street Improvement Project (SANDAG MPO ID SB20) to the Pavement Resurfacing Project (SANDAG MPO ID SB16) is needed to reconcile the remaining balance and to satisfy the TransNet Ordinance accounting and audit requirements.

MEETING DATE: January 13, 2021 **ORIGINATING DEPT**: City Manager's Office

SUBJECT: Council Consideration of Resolution 2021-004 Authorizing the

City Manager to Enter into a Professional Services Agreement

for State Legislative Advocacy Services

BACKGROUND:

On March 27, 2019, the City Council adopted Resolution 2019-036 authorizing the City Manager to retain and enter into a Professional Services Agreement (PSA) for legislative advocacy services for the City of Solana Beach (City). Subsequently, the City executed a PSA with Emanuel Jones & Associates, Inc. (EJA) to provide those services. The PSA with EJA expired on December 31, 2020.

This item is before City Council to consider adopting Resolution 2021-004 (Attachment 1) authorizing the City Manager to enter into another PSA with EJA for the next two-year legislative session to provide legislative advocacy services.

DISCUSSION:

During any given legislative period, bills with potentially significant impacts on the City are introduced and oftentimes revised many times that require close monitoring for timely reporting to the City Council. A professional legislative consulting group can provide essential services to the City to ensure that the impacts of such bills are closely monitored, evaluated and reported to the City and City Council.

EJA has offered to provide legislative services to the City for the next two-year legislative session that will expire on December 31, 2022. EJA has also agreed to provide their services at the same rate as the prior two-year PSA. The scope of services will include:

- Monitor, identify and prioritize challenges and opportunities for the City with respect to issues under consideration by the State Legislature and state and regional agencies, specifically those issues defined in the City's adopted Legislative Policy Guidelines.
- In consultation with the City Manager's Office, lobby state legislature members and departments as necessary to pursue City objectives.

CITY COUNCIL ACTION:		

AGENDA ITEM A.7.

- Complete in a timely fashion all forms and reports required of lobbyists by the state and other relevant jurisdictions.
- Provide timely telephone or e-mail updates with designated staff; provide status reports during the legislative session; and attend meetings of the City Council and with City personnel as reasonably requested.

It is recommended that the Council adopt Resolution 2021-004 authorizing the City Manager to execute a PSA to provide specific and targeted advocacy and lobbying services on behalf of the City on any pertinent legislation consistent with the City's legislative priorities and recommend actions as may be needed to promote the City's interests.

CEQA COMPLIANCE STATEMENT:

FISCAL IMPACT:

There are sufficient funds in the City Manager's budget unit for Fiscal Year 2020/21 to pay the cost of a lobbying firm for the current fiscal year and monies will be appropriated in the following fiscal years to cover the remainder of the contract term in a total amount that would not exceed \$62,100.

SUBJECT:

Ratify Execution of a Letter of Credit as a Substitute for Previously Approved Deposit Account Control Agreement with River City Bank and San Diego Gas & Electric to Comply with California Public Utilities Commission D.18-05-022 Related to Community Choice

Aggregation Financial Security Requirement

BACKGROUND:

Community Choice Aggregation (CCA), authorized by Assembly Bill 117, is a state law that allows cities, counties and other authorized entities to aggregate electricity demand within their jurisdictions in order to purchase and/or generate alternative energy supplies for residents and businesses within their jurisdiction while maintaining the existing electricity provider for transmission and distribution services. The goal of a CCA is to provide a higher percentage of renewable energy electricity at competitive and potentially cheaper rates than existing Investor Owned Utilities (IOUs), while giving consumers local choices and promoting the development of renewable power sources and programs and local job growth.

The City of Solana Beach's (City) CCA, Solana Energy Alliance (SEA), was established by the City Council through adoption of Ordinance 483 on December 13, 2017 and began serving customers in June 2018. SEA is the first CCA to launch in San Diego Gas & Electric territory and remains the only CCA operating in San Diego County.

This item is before the City Council to ratify execution of a Letter of Credit as a substitute for the previously approved Deposit Account Control Agreement (Agreement) with River City Bank (RCB) and San Diego Gas & Electric (SDG&E) to comply with California Public Utilities Commission (CPUC) D. 18-05-022 related to the Community Choice Aggregation (CCA) Financial Security Requirement (FSR).

CITY COUNCIL ACTION:		

DISCUSSION:

The City Council established SEA with the goal of offering cleaner energy, local control, rate savings compared to SDG&E and supporting the City's Climate Action Plan's aggressive goal of 100% renewable energy by 2035. SEA launched with its default product, SEA Choice, sourced from 50% renewable and 75% greenhouse gas free sources. In addition, SEA offers SEA Green, its voluntary 100% renewable energy product option. The City Council also established a goal of providing a 3% rate savings to customers as compared to SDG&E's generation rates.

Based on SEA's power procurement in 2019, SEA provided its customers with 100% greenhouse gas free energy in 2019, exceeding its goal of a minimum 75%.

CPUC Decision 18-05-022

In 2018, the CPUC issued Decision 18-05-022 (Decision) which established re-entry fees and financial security requirements (FSR) for CCAs. The purpose of the FSR instrument is to cover costs borne by SDG&E in the event of a mass involuntary return of SEA customers to SDG&E, such as the decertification of SEA or a CCA failure. SDG&E may only withdraw funds from the financial security instrument for unpaid administrative or procurement costs associated with the return of SEA customers to the IOU. Any withdrawal of those funds must first be approved by the CPUC.

Under the Decision, IOUs, including SDG&E, were required to submit advice letters implementing the FSR requirements. Those advice letters were submitted in August 2018; however, they were suspended by the CPUC until final implementation issues could be resolved. On October 8, 2020, the CPUC adopted the Resolution finalizing the implementation of the IOU advice letters and setting the minimum FSR at \$147,000. To date, CCAs have been operating under an interim amount of \$100,000, which was submitted to the CPUC as part of SEA's CCA registration process.

Additionally, the Resolution requires that SEA submit an advice letter to the CPUC with the FSR instrument as proof of compliance no later than December 8, 2020. In accordance with the Resolution, once the advice letter is submitted and compliance with the FSR is demonstrated by way of an executed Agreement, the interim financial security amount of \$100,000 currently held by the CPUC will be returned to the City. Once SEA's customers have successfully transitioned to the Clean Energy Alliance (CEA), SEA will work with the CPUC to decertify as a CCA and cancel the letter of credit.

At its November 18, 2020 meeting, the City Council authorized execution of a Deposit Account Control Agreement (DACA) with RCB and SDG&E to meet the FSR requirements. Unfortunately, agreement with SDG&E regarding terms of the DACA was not able to be reached. In order to meet the deadline of December 8, 2020, Staff felt it prudent to move forward with substituting the DACA with a letter of credit, which is an alternative acceptable form of financial instrument to meet the FSR. The letter of credit was executed in the amount of \$147,000, which is consistent with the previous Council approval. The issuing bank is USBank, which is a financial institution that met the

requirements related to issuing letters of credit to satisfy the FSR. The required Advice Letter reflecting compliance with meeting the FSR requirement, as well as requesting refund of the \$100,000 original cash deposit, was filed with the CPUC on December 8, 2020.

CEQA COMPLIANCE STATEMENT:

The action being considered by the City Council is exempt from the California Environmental Quality Act (CEQA) because it is not a "project" under Section 15378(b)(5) of CEQA Guidelines.

FISCAL IMPACT:

Fees related to issuance of the letter of credit in the amount of \$985 were deducted from the SEA lockbox.

FROM: Gregory Wade, City Manager

MEETING DATE: January 13, 2021

ORIGINATING DEPT: City Manager Department/City Attorney's Office

SUBJECT: Council Consideration and Potential Adoption of Resolution 2021-008 Confirming City Manager/Director of Emergency Services' Order 2021-001 Suspending

Temporary Use Permits during the State Regional Stay At

Home Order or County Public Health Order

BACKGROUND:

On March 11, 2020, the World Health Organization (WHO) declared COVID-19, the illness caused by the novel coronavirus, a pandemic, pointing at that time to over 118,000 cases of COVID-19 in over 110 countries and territories around the world and the sustained risk of further global spread. This was preceded by declarations of emergency by both the County of San Diego and State of California on February 14, 2020, and March 4, 2020, respectively, followed by a federal emergency declaration on March 13, 2020, as a result of the threat posed by COVID-19. On March 16, 2020, pursuant to Section 2.28.060(A)(1) of the Solana Beach Municipal Code (SBMC), the Director of Emergency Services/City Manager proclaimed a state of local emergency in the City of Solana Beach due to COVID-19, which was ratified by the City Council through adoption of Resolution 2020-036.

Since that time, there have been numerous Orders and Guidance by the California Department of Public Health (CDPH) and the Health Officer of the County of San Diego to curtail the spread of COVID-19. On December 3, 2020, the CDPH issued a Regional Stay at Home Order (Regional Order) which remains in effect for any of the five state regions in which the Intensive Care Unit (ICU) bed capacity is less than 15%. The Regional Order imposed new temporary restrictions, as well prohibiting any activities that are not associated with critical infrastructure, such as any operation of any non-essential businesses, while allowing critical infrastructure sectors to operate, but only if they continue to modify operations pursuant to the applicable sector guidance. On December 10, 2020, the Health Officer of the County of San Diego issued an Order of

COUNCIL ACTION:		

the Health Officer and Emergency Regulations (Health Order) requiring every essential business to comply with industry guidance issued by the State of California.

During a local emergency, Section 2.28.060(A)(6)(a) of the Solana Beach Municipal Code empowers the Director of Emergency Services/City Manager to make and issue rules and regulations of matters reasonably related to the protection of life and property as affected by such emergency; provided, however, such rules and regulations must be confirmed at the earliest practicable time by the City Council.

The item before the City Council is to consider and adopt Resolution 2021-008 (Attachment 1), confirming City Manager/Director of Emergency Services' Order 2021-001 (Attachment 2) Suspending Temporary Use Permits during the State Regional Stay at Home Order or County Public Health Order.

DISCUSSION:

The COVID-19 pandemic continues to spread rapidly throughout the State and County and is impacting the health and welfare of the City of Solana Beach. A new strain of COVID-19 that is 70% more likely to be spread has also been identified in the County of San Diego. This strain was originally identified in the United Kingdom. Since persons contracting this strain in the County have had no history of travel, this highly contagious strain is community based. The ICU bed capacity in the Southern California Region, which includes San Diego County, is currently at 0.0%.

In the face of these increasingly alarming statistics, some businesses in the City continue to operate in violation of the Regional Order or the Health Order and are putting the health and safety of the public at further risk. At various times during the COVID-19 local emergency, protocols for operating various business have been changed by the State and/or the County. For example, at certain points prior to the issuance of the Regional Order and the Health Order, restaurants were allowed to offer outdoor dining services and the City of Solana Beach issued various Temporary Use Permits (TUPs) allowing applicant restaurants to temporarily expand into outdoor seating areas on the terms and conditions provided in the TUPs.

Pursuant to the terms of the TUPs, the City reserved the right to modify or revoke the TUP for any applicant's failure to comply with conditions of any other local, state or federal regulations. After the issuance of the Regional Order and the Health Order, restaurants are no longer allowed to offer outdoor dining services and may only remain open for take-out.

On January 4, 2021, under Section 2.28.060(A)(6)(a) of the Solana Beach Municipal Code, the Director of Emergency Services/City Manager issued Order 2021-001, suspending TUPs during the Regional Order or Health Order; declaring businesses that continue to operate under a suspended TUP subject to issuance of administrative citations under Section 1.18.030 and any and all enforcement provisions of the Solana Beach Municipal Code; and declaring businesses that continue to operate in violation of the Regional Order, the Health Order or other applicable local, state and federal rules, regulations or orders related to the local emergency to be detrimental to public health, safety and general welfare and, thus constitute public nuisances in violation of the

Solana Beach Municipal Code. Resolution 2021-036 (Attachment 1) would ratify and confirm such Emergency Order 2021-001.

CEQA COMPLIANCE STATEMENT:

The proposed City Council action is not subject to the California Environmental Quality Act (CEQA) pursuant to the CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, Sections: 15060(c)(2) (the activity will not result in a direct or reasonably foreseeable indirect physical change in the environment); 15060(c)(3) (the activity is not a project as defined in Section 15378); and 15061(b)(3), because the activity is covered by the general rule that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Because there is no possibility that the Resolution may have a significant adverse effect on the environment, the action is exempt from CEQA.

FISCAL IMPACT:

There are no direct fiscal impacts related to the adoption of the Resolution or the Ordinances.

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers

FROM: Gregory Wade, City Manager

MEETING DATE: January 2021

ORIGINATING DEPT: Community Development Department

SUBJECT: Public Hearing: Request for DRP and SDP to Demolish an

Existing Single-Family Residence, Construct a Replacement Two-Story, Single-Family Residence with an Attached Partially Subterranean Garage, and Perform Associated Site Improvements at 622 Glenmont Drive (Case #: DRP20-002/SDP20-004 Applicants: Jim and June

Sanson; APN: 263-095-13; Resolution No. 2021-002)

BACKGROUND:

The Applicants, Jim and June Sanson, are requesting City Council approval of a Development Review Permit (DRP) and Structure Development Permit (SDP) to demolish a single-family residence, construct a replacement two-story, single-family residence including a partially subterranean, three-car garage, and perform associated site improvements at 622 Glenmont Drive. The 10,800 square-foot lot is located within the Low Medium Residential (LMR) Zone and the Scaled Residential Overlay Zone (SROZ).

The project proposes a basement garage/storage area of 814 square feet, a main floor living area of 2,916 square feet and an upper level of 705 square feet with grading in the amounts of 390 yd³ cut, 70 yd³ of fill and 320 yd³ of export as well as 11 yd³ cut for footings. The tallest point of the proposed residence would be 24.91 feet above the proposed grade and the highest point of the structure would not exceed 225.50 feet above Mean Sea Level (MSL). The project requires a DRP for 1) an aggregate grading quantity in excess of 100 cubic yards, and 2) a structure that exceeds 60 percent of the maximum allowable floor area. The project requires a SDP because the proposed development exceeds 16 feet in height above existing grade.

The issue before the Council is whether to approve, approve with conditions, or deny the Applicants' request as contained in Resolution 2021-002 (Attachment 1).

CITY COUNCIL ACTION:		

DISCUSSION:

The subject property is located on the east side of Glenmont Drive three properties north of the intersection of Glenmont Drive and Lynwood Avenue. The lot is rectangular in shape with 90 feet in frontage along Glenmont Drive and a lot depth of approximately 120 feet. The existing lot topography is generally flat with a slope up from street level of approximately nine feet within the front yard setback. The lot continues to slope up approximately five feet within the rear 10 feet of the lot. With the proposed project, the driveway would be located in the northwest corner of the lot where the existing driveway is currently located, however, the proposed driveway would be excavated in order to provide access to the proposed partially subterranean basement garage and storage area. A mudroom and staircase to the main level living area is also proposed in the basement area. Retaining walls are proposed on each side of the driveway that would support the higher existing grade adjacent to the driveway. The remainder of the front yard setback area would have terraced retaining walls that follow the existing slope and a pedestrian walkway would provide access to the front door on the main level toward the center of the lot. The buildable area would have minimal grading to provide a flat pad and usable yard area with retaining walls that follow the southern and eastern property lines to support the higher grades on adjacent properties. The project plans are provided in Attachment 2.

Table 1 (below) provides a comparison of the Solana Beach Municipal Code (SBMC) applicable zoning regulations with the Applicants' proposed design.

Staff has prepared draft findings for approval of the project in the attached Resolution 2021-002 for Council's consideration based upon the information in this report. The applicable SBMC sections are provided in italicized text and conditions from the Community Development, Engineering, and Fire Departments are incorporated in the Resolution of Approval. The Council may direct Staff to modify the Resolution to reflect the findings and conditions it deems appropriate as a result of the Public Hearing process. If the Council determines the project is to be denied, Staff will prepare a Resolution of Denial for adoption at a subsequent Council meeting.

The following is a discussion of the findings for a DRP and SDP as each applies to the proposed project as well as references to recommended conditions of approval contained in Resolution Development Review Permit Compliance (SBMC Section 17.68.40):

A DRP is required for the following reasons: 1) grading in excess of 100 cubic yards (aggregate); and 2) a structure that exceeds 60% of the maximum allowable floor area.

In addition to meeting zoning requirements, the project must also be found in compliance with development review criteria. The following is a list of the development review criteria topics:

- 1. Relationship with Adjacent Land Uses
- 2. Building and Structure Placement
- 3. Landscaping

Proposed Accessory Structure: No

- 4. Roads, Pedestrian Walkways, Parking, and Storage Areas
- 5. Grading
- 6. Lighting
- 7. Usable Open Space

The Council may approve, or conditionally approve, a DRP only if all of the findings listed below can be made. Resolution 2021-002 provides the full discussion of the findings.

- 1. The proposed development is consistent with the general plan and all applicable requirements of the zoning ordinance including special regulations, overlay zones, and specific plans.
- 2. The proposed development complies with the development review criteria.
- 3. All required permits and approvals issued by the city, including variances, conditional use permits, comprehensive sign plans, and coastal development permits have been obtained prior to or concurrently with the development review permit.

4. If the development project also requires a permit or approval to be issued by a state or federal agency, the city council may conditionally approve the development review permit upon the Applicants obtaining the required permit or approval from the other agency.

If the above findings cannot be made, the Council shall deny the DRP. The following is a discussion of the applicable development review criteria as they relate to the proposed project.

Relationship with Adjacent Land Uses:

The property is located within the LMR Zone. Properties to the north, south, east and west are also located within the LMR Zone. The surrounding properties are developed with one and two-story, single-family residences.

The project, as designed, is consistent with the permitted uses for the LMR Zone as described in SBMC Sections 17.20.010 and 17.12.020. The property is designated Low Medium Density Residential in the General Plan and intended for single-family residences developed at a maximum density of 4 dwelling units per acre. The proposed development could be found to be consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods, and the rehabilitation of deteriorated neighborhoods.

The property is not located within any of the City's Specific Plan areas; however, it is located within the boundaries of the Scaled Residential Overlay Zone (SROZ) and within the Coastal Zone. The project has been evaluated, and could be found to be in conformance with, the regulations of the SROZ, which are discussed further later in this report. As a condition of project approval, the Applicants would be required to obtain a Coastal Development Permit, Waiver or Exemption from the California Coastal Commission prior to the issuance of Building or Grading Permits.

Building and Structure Placement:

The Applicants are proposing to construct a replacement single-family residence with a partially subterranean garage and mudroom with a staircase that leads to the main floor living area. The replacement residence, as designed, would be located within the buildable area.

The Applicants are proposing a partially subterranean basement garage with a mudroom under the northwest corner of the residence. The entire basement level including the mudroom would be 814 square-feet and would have 21.33 feet of exposure along the west side and five feet of exposure along the northern side.

According to SBMC 17.48.040.C, the proposed lower level area is considered a "Basement- Exposed Side(s)" in which the entire lower level that is partially subterranean is subject to the 2 percent formula. As long as there are only two continuous exposed sides of the basement area and the exposure is less than 50 linear feet, a portion of the

lower level could be exempt from the calculation of floor area. A building side is considered exposed when the finished floor of the living area directly above the basement (at any point) is more than three feet above the adjacent natural or finished grade, whichever is lower. In the proposed design, the only exposure is along the western side to allow access to the garage door and the front entry.

SBMC 17.48.040 and 17.20.030 indicates that required parking spaces provided within a garage are exempt from the calculation of floor area. When using the 2 percent formula, the square footage of the required parking is subtracted from the total proposed square footage basement level first and then the remaining square footage is multiplied by the linear exposure of the basement level and then multiplied by 2 percent. The result is the amount of square footage of the proposed garage to be included in the calculation of floor area.

The entire basement area is 814 square feet. A single-family residence requires two parking spaces of 200 square feet each. Therefore, 400 square feet would be subtracted from the proposed partially subterranean basement level square-footage because it would provide required parking. The total linear exposure of the proposed basement level is 26.33 feet. The 2 percent calculation for this project would be as follows:

$$814 \text{ ft}^2 - 400 \text{ ft}^2 = 414 \text{ ft}^2$$

 $414 \text{ ft}^2 \text{ X } 26.33 \text{ ft. X } 0.02 = 218 \text{ ft}^2$
 $414 \text{ ft}^2 - 218 = 196 \text{ ft}^2 \text{ is exempt}$

Pursuant to this calculation, 218 square feet of the proposed partially subterranean level would be included in the calculation of floor area and 196 square feet would be exempt or subtracted from the floor area.

In addition to the basement area, the proposed project includes a 2,916 square-foot main floor living area consisting of an entry area, kitchen, living room, dining room, family room, laundry room and powder room as well as a guest master suite and two bedrooms with ensuite bathrooms. The proposed 705 square foot upper level would consist of a master suite that leads to access to the proposed deck above the main floor. The subtotal of the proposed residence would be 4,435 square feet of floor area. The floor area exemptions, related to the basement and partially subterranean garage previously explained in this report, total 596 square feet. With the applicable exemptions, the Applicants propose a total of 3,839 square feet of floor area, which is one square foot below the maximum allowable floor area for the 3,840 square-foot lot, pursuant to the SROZ regulations.

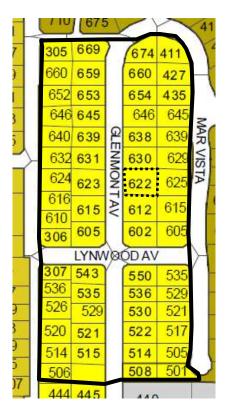

The maximum floor area calculation for this project is as follows:

0.50 for first 6,000 ft ²	3,000 ft ²
0.175 for 6,001 to 15,000 ft ²	840 ft ²
Total Allowable Floor area:	3,840 ft ²

The proposed project, as designed, meets the minimum required setbacks and is below the maximum allowable floor area for the property.

Neighborhood Comparison:

Staff compared the proposed project to 49 other properties within the surrounding area. This area includes properties along both sides of Glenmont Drive north of the intersection of Lynwood Avenue, the south side of Canyon Drive, and the west side of Mar Vista Drive, as shown on the following map:

The properties evaluated in this comparison are located in the LMR Zone. The existing homes range in size from 894 square feet to 4,151 square feet, according to the County Assessor records. It should be noted that the County Assessor does not include the garages, covered porch area, unfinished basement, or accessory building area in the total square footage. Accordingly, the building area of the proposed project has been calculated for comparison purposes by deleting the area of the proposed garages, the covered porch, and ceiling height over 15 feet as follows:

Project Gross Building Area:	3,839 ft ²
Delete Partially Subterranean Garage:	<u>- 651 ft²</u>
Project Area for Comparison to Assessor's Data:	3,188 ft ²

Table 2 is based upon the County Assessor's data and SanGIS data. It contains neighboring lot sizes, the square footage of existing development and the maximum allowable square footage for potential development on each lot.

Fences, Walls and Retaining Walls:

Within the front yard setback area, the SBMC Section 17.20.040(O) allows fences and walls, or any combination thereof, to be no higher than 42 inches in height as measured from existing grade, except for an additional two feet of fence that is at least 80% open to light. Fences, walls and retaining walls located within the rear and interior side yards are allowed to be up to six feet in height with an additional 24 inches that is 50% open to light and air.

Stepped retaining walls are proposed in the front yard setback area following the topography of the existing grade. Retaining walls are proposed around the driveway to support the higher existing grade on either side driveway in order to provide access to the proposed partially subterranean garage and along the southern and eastern property lines in order to support the higher grade elevation on the adjacent properties after grading takes place onsite. The proposed retaining walls in the front yard will range in size from the existing grade level to approximately 3.5 feet above the existing grade. The proposed retaining walls along the southern and eastern elevations would be below the existing grade level but would range in height from one to three feet above the proposed finished grade. The proposed retaining walls as designed are in compliance with the maximum building heights for walls as measured from the existing grade.

Landscape:

The project is subject to the current water efficient landscaping regulations of SBMC Chapter 17.56. A Landscape Documentation Package is required for new development projects with an aggregate landscape equal to or greater than 500 square feet requiring a building permit, plan check or development review. The Applicants provided a conceptual landscape plan that has been reviewed by the City's third-party landscape architect, who has recommended approval. The Applicants will be required to submit detailed construction landscape drawings that will be reviewed by the City's third-party landscape architect for conformance with the conceptual plan. In addition, the City's third-party landscape architect will perform inspections during the construction phase of the project. A separate condition has been added to require that native or drought-tolerant and non-invasive plant materials and water-conserving irrigation systems are required to be incorporated into the landscaping to the extent feasible.

Parking:

SBMC Section 17.52.040 and the Off-Street Parking Design Manual (OSPDM) require two (2) parking spaces for a single-family residence. The Applicants propose to maintain the same approximate location of the existing driveway in the northwest corner of the lot. However, the existing driveway would be excavated in order to provide access to the partially subterranean, two-car garage and storage area. SBMC Section 17.08.030

indicates that required parking up to 200 square feet per parking space provided in a garage is exempt from the floor area calculation. The proposed garage will provide two parking spaces. Two spaces are required, therefore, 400 square feet of garage area is exempt from the project's floor area calculation.

Grading:

The project includes grading in the amount 390 yd³ cut, 70 yd³ of fill and 320 yd³ of export as well as 11 yd³ cut for footings. Excavation is proposed in order to provide access to the proposed partially subterranean garage. Additional site grading is proposed in order to provide terraced retaining walls in the front yard setback area and a flat pad and usable rear yard area. Retaining walls are proposed around the structure to support the higher grade elevations on adjacent properties. The adjacent properties would range between being at the same approximate grade level to about a five-foot difference in grade.

Lighting:

A condition of project approval requires that all new exterior lighting fixtures comply with the City-Wide Lighting Regulations of the Zoning Ordinance (SBMC 17.60.060). All light fixtures shall be shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding area.

Usable Open Space:

The project consists of the construction of a replacement two-story, single-family residence with a basement garage on a developed residential lot; therefore, usable open space and recreational facilities are neither proposed nor required according to SBMC Section 17.20.040. As a condition of project approval, the Applicants will be required to pay the applicable Park Development Fee.

Structure Development Permit Compliance:

The proposed structure exceeds 16 feet in height above the pre-existing grade; therefore, the project must comply with all of the View Assessment requirements of SBMC Chapter 17.63 and the Applicants were required to complete the SDP process. The Applicants had story poles erected onsite. A final Story Pole Height Certification was issued by a licensed land surveyor on September 30, 2020, which showed the highest story pole certified at 225.50 MSL and 24.91 feet above the proposed grade. Notices to apply for View Assessment were mailed to property owners and occupants within 300 feet of the project site, which established a deadline to file for View Assessment on November 6, 2020. No applications for View Assessment were received by the City. Therefore, if the Council is able to make the required findings to approve the DRP, the SDP would be approved administratively.

As a condition of approval, a height certificate prepared by a licensed land surveyor will be required prior to the framing inspection certifying that the tallest point of the proposed

residence will not exceed 24.91 feet above the proposed grade and the highest point of the structure will not exceed 225.50 feet above the Mean Sea Level (MSL).

Public Hearing Notice:

Notice of the City Council Public Hearing for the project was published in the Union Tribune more than 10 days prior to the public hearing. The same public notice was mailed to property owners and occupants within 300 feet of the proposed project site on December 18, 2020. As of the date of preparation of this Staff Report, Staff has not received any official correspondence.

In conclusion, the proposed project, as conditioned, could be found to be consistent with the Zoning regulations and the General Plan. Staff has prepared draft findings for approval of the project in the attached Resolution 2021-002 for Council's consideration based upon the information in this report. Conditions from the Community Development, Engineering, and Fire Departments are incorporated in the Resolution of Approval.

Should the Council determine that the findings can be made to approve the project; the SDP will be approved concurrently with the DRP. The Council may direct Staff to modify the Resolution to reflect the findings and conditions it deems appropriate as a result of the Public Hearing process. If the Council determines the project is to be denied, Staff will prepare a Resolution of Denial for adoption at a subsequent Council meeting.

CEQA COMPLIANCE STATEMENT:

The project is exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15303 of the State CEQA Guidelines. Class 3 consists of construction and location of limited numbers of new, small facilities or structures. Examples of this exemption include one single-family residence or second dwelling unit in a residential zone. In urbanized areas, up to three-single-family residences may be constructed or converted under this exemption.

WHEREAS, the Public Hearing was conducted pursuant to the provisions of Solana Beach Municipal Code Section 17.72.030; and

WHEREAS, at the Public Hearing on January 13, 2021, the City Council received and considered evidence concerning the proposed application; and

WHEREAS, the City Council of the City of Solana Beach found the application request exempt from the California Environmental Quality Act pursuant to Section 15303 of the State CEQA Guidelines; and

WHEREAS, this decision is based upon the evidence presented at the Hearing, and any information the City Council gathered by viewing the site and the area as disclosed at the hearing.

NOW THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

- I. That the foregoing recitations are true and correct.
- II. That the request for a DRP and SDP to demolish an existing single-family residence and construct a replacement two-story, 3,621 square foot single-family residence with a 814 square foot partially-subterranean garage and basement area and perform associated site improvements at 622 Glenmont Drive, is conditionally approved based upon the following Findings and subject to the following Conditions:

III. FINDINGS

A. In accordance with Section 17.68.040 (Development Review Permit) of the

City of Solana Beach Municipal Code, the City Council finds the following:

I. The proposed project is consistent with the General Plan and all applicable requirements of SBMC Title 17 (Zoning Ordinance), including special regulations, overlay zones and specific plans.

General Plan Consistency: The project, as conditioned, is consistent with the City's General Plan designation of Low Medium Density Residential, which allows for a maximum of four dwelling units per acre. The development is also consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods, and the rehabilitation of deteriorated neighborhoods.

Zoning Ordinance Consistency: The project is consistent with all applicable requirements of the Zoning Ordinance (Title 17) (SBMC 17.20.030 and 17.48.040), which delineates maximum allowable Floor Area Ratio (FAR), Permitted Uses and Structures (SBMC Section 17.20.020) which provides for uses of the property for a single-family residence. Further, the project adheres to all property development regulations established for the Low Medium Residential LMR Zone and cited by SBMC Section 17.020.030.

The project is consistent with the provisions for minimum yard dimensions (i.e., setbacks) and the maximum allowable Floor area (FAR), maximum building height, and parking requirements.

- II. The proposed development complies with the following development review criteria set forth in Solana Beach Municipal Code Section 17.68.040.F:
 - a. Relationship with Adjacent Land Uses: The development shall be designed in a manner compatible with and where feasible, complimentary to existing and potential development in the immediate vicinity of the project site. Site planning on the perimeter of the development shall give consideration to the protection of surrounding areas from potential adverse effects, as well as protection of the property from adverse surrounding influences.

The property is located within the LMR Zone. Properties to the north, south, east and west are also located within the LMR Zone. The surrounding properties are developed with one and two-story, single-family residences.

The project, as designed, is consistent with the permitted uses for the LMR Zone as described in SBMC Sections 17.20.010 and 17.12.020. The property is designated Low Medium Density

Resolution 2021-002 DRP20-002/SDP20-004 Sanson- 622 Glenmont Page 3 of 15

Residential in the General Plan and intended for single-family residences developed at a maximum density of 4 dwelling units per acre. The proposed development could be found to be consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods. and the rehabilitation of deteriorated neighborhoods.

The property is not located within any of the City's Specific Plan areas; however, it is located within the boundaries of the Scaled Residential Overlay Zone (SROZ) and within the Coastal Zone. The project has been evaluated, and could be found to be in conformance with, the regulations of the SROZ, which are discussed further later in this report. The Applicants are required to obtain a Coastal Development Permit, Waiver or Exemption from the California Coastal Commission prior to the issuance of Building or Grading Permits.

b. Building and Structure Placement: Buildings and structures shall be sited and designed in a manner which visually and functionally enhances their intended use.

The Applicants are proposing to construct a replacement singlefamily residence with a partially subterranean garage and mudroom with a staircase that leads to the main floor living area. The replacement residence, as designed, would be located within the buildable area.

The Applicants are proposing a partially subterranean basement garage with a mudroom under the northwest corner of the residence. The entire basement level including the mudroom would be 814 square-feet and would have 21.33 feet of exposure along the west side and five feet of exposure along the northern side.

According to SBMC 17.48.040.C, the proposed lower level area is considered a "Basement- Exposed Side(s)" in which the entire lower level that is partially subterranean is subject to the 2 percent formula. As long as there are only two continuous exposed sides of the basement area and the exposure is less than 50 linear feet, a portion of the lower level could be exempt from the calculation of floor area. A building side is considered exposed when the finished floor of the living area directly above the basement (at any point) is more than three feet above the adjacent natural or finished grade, whichever is lower. In the

Resolution 2021-002 DRP20-002/SDP20-004 Sanson- 622 Glenmont Page 4 of 15

proposed design, the only exposure is along the western side to allow access to the garage door and the front entry.

SBMC 17.48.040 and 17.20.030 indicates that required parking spaces provided within a garage are exempt from the calculation of floor area. When using the 2 percent formula, the square footage of the required parking is subtracted from the total proposed square footage basement level first and then the remaining square footage is multiplied by the linear exposure of the basement level and then multiplied by 2 percent. The result is the amount of square footage of the proposed garage to be included in the calculation of floor area.

The entire basement area is 814 square feet. A single-family residence requires two parking spaces of 200 square feet each. Therefore, 400 square feet would be subtracted from the proposed partially subterranean basement level square-footage because it would provide required parking. The total linear exposure of the proposed basement level is 26.33 feet. The 2 percent calculation for this project would be as follows:

 $814 \text{ ft}^2 - 400 \text{ ft}^2 = 414 \text{ ft}^2$ $414 \text{ ft}^2 \text{ X } 26.33 \text{ ft. X } 0.02 = 218 \text{ ft}^2$ $414 \text{ ft}^2 - 218 \text{ ft}^2 = 196 \text{ ft}^2 \text{ is exempt}$

Pursuant to this calculation, 218 square feet of the proposed partially subterranean level would be included in the calculation of floor area and 196 square feet would be exempt or subtracted from the floor area.

In addition to the basement area, the proposed project includes a 2,916 square-foot main floor living area consisting of an entry area, kitchen, living room, dining room, family room, laundry room and powder room as well as a guest master suite and two bedrooms with ensuite bathrooms. The proposed 705 square foot upper level would consist of a master suite that leads to access to the proposed deck above the main floor. The subtotal of the proposed residence would be 4,435 square feet of floor area. The floor area exemptions, related to the basement and partially subterranean garage previously explained in this report, total 596 square feet. With the applicable exemptions, the Applicants propose a total of 3,839 square feet of floor area, which is one square foot below the maximum allowable floor area for the 3,840 square-foot lot, pursuant to the SROZ regulations.

The maximum floor area calculation for this project is as follows:

0.50 for first 6,000 ft ²	3,000 ft ²
0.175 for 6,001 to 15,000 ft ²	840 ft ²
Total Allowable Floor area:	3,840 ft ²

The proposed project, as designed, meets the minimum required setbacks and is below the maximum allowable floor area for the property.

c. Landscaping: The removal of significant native vegetation shall be minimized. Replacement vegetation and landscaping shall be compatible with the vegetation of the surrounding area. Trees and other large plantings shall not obstruct significant views when installed or at maturity.

The project is subject to the current water efficient landscaping regulations of SBMC Chapter 17.56. Α Landscape Documentation Package is required for new development projects with an aggregate landscape equal to or greater than 500 square feet requiring a building permit, plan check or development review. The Applicants provided a conceptual landscape plan that has been reviewed by the City's third-party landscape architect, who has recommended approval. The Applicants will be required to submit detailed construction landscape drawings that will be reviewed by the City's third-party landscape architect for conformance with the conceptual plan. In addition, the City's third-party landscape architect will perform inspections during the construction phase of the project. A separate condition has been added to require that native or drought-tolerant and non-invasive plant materials and waterconserving irrigation systems are required to be incorporated into the landscaping to the extent feasible.

d. Roads, Pedestrian Walkways, Parking and Storage Areas: Any development involving more than one building or structure shall provide common access roads and pedestrian walkways. Parking and outside storage areas, where permitted, shall be screened from view, to the extent feasible, by existing topography, by the placement of buildings and structures, or by landscaping and plantings.

SBMC Section 17.52.040 and the Off-Street Parking Design Manual (OSPDM) require two (2) parking spaces for a single-family residence. The Applicants propose to maintain the same approximate location of the existing driveway in the northwest corner of the lot. However, the existing driveway would be excavated in order to provide access to the partially

Resolution 2021-002 DRP20-002/SDP20-004 Sanson- 622 Glenmont Page 6 of 15

subterranean, two-car garage and storage area. SBMC Section 17.08.030 indicates that required parking up to 200 square feet per parking space provided in a garage is exempt from the floor area calculation. The proposed garage will provide two parking spaces. Two spaces are required, therefore, 400 square feet of garage area is exempt from the project's floor area calculation.

e. Grading: To the extent feasible, natural topography and scenic features of the site shall be retained and incorporated into the proposed development. Any grading or earth-moving operations in connection with the proposed development shall be planned and executed so as to blend with the existing terrain both on and adjacent to the site. Existing exposed or disturbed slopes shall be landscaped with native or naturalized non-native vegetation and existing erosion problems shall be corrected.

The project includes grading in the amount 390 yd³ cut, 70 yd³ of fill and 320 yd³ of export as well as 11 yd³ cut for footings. Excavation is proposed in order to provide access to the proposed partially subterranean garage. Additional site grading is proposed in order to provide terraced retaining walls in the front yard setback area and a flat pad and usable rear yard area. Retaining walls are proposed around the structure to support the higher grade elevations on adjacent properties. The adjacent properties would range between being at the same approximate grade level to about a five foot difference in grade.

f. Lighting: Light fixtures for walkways, parking areas, driveways, and other facilities shall be provided in sufficient number and at proper locations to assure safe and convenient nighttime use. All light fixtures shall be appropriately shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding areas per SBMC 17.60.060 (Exterior Lighting Regulations).

All new exterior lighting fixtures will comply with the City-Wide Lighting Regulations of the Zoning Ordinance (SBMC 17.60.060). All light fixtures shall be shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding area.

g. Usable Open Space: Recreational facilities proposed within required usable open space shall be located and designed to maintain essential open space values.

The project consists of the construction of a replacement twostory, single-family residence with a basement garage on a developed residential lot; therefore, usable open space and recreational facilities are neither proposed nor required according to SBMC Section 17.20.040. The Applicants are required to pay the applicable Park Development Fee.

III. All required permits and approvals including variances, conditional use permits, comprehensive sign plans, and coastal development permits have been obtained prior to or concurrently with the development review permit.

All required permits, including a Structure Development Permit, are being processed concurrently with the Development Review Permit.

IV. If the development project also requires a permit or approval to be issued by a state or federal agency, the city council may conditionally approve the development review permit upon the Applicant obtaining the required permit or approval from the other agency.

The Applicants are required to obtain approval from the California Coastal Commission prior to issuance of Building Permits.

B. In accordance with Section 17.63.040 (Structure Development Permit) of the Solana Beach Municipal Code, the City Council finds the following:

The proposed structure exceeds 16 feet in height above the pre-existing grade; therefore, the project must comply with all of the View Assessment requirements of SBMC Chapter 17.63 and the Applicants were required to complete the SDP process. The Applicants had story poles erected onsite. A final Story Pole Height Certification was issued by a licensed land surveyor on September 30, 2020, which showed the highest story pole certified at 225.50 MSL and 24.91 feet above the proposed grade. Notices to apply for View Assessment were mailed to property owners and occupants within 300 feet of the project site, which established a deadline to file for View Assessment on November 6, 2020. No applications for View Assessment were received by the City.

A height certificate prepared by a licensed land surveyor will be required prior to the framing inspection certifying that the tallest point of the proposed residence will not exceed 24.91 feet above the proposed grade and the highest point of the structure will not exceed 225.50 feet above the Mean Sea Level (MSL).

- 2. 3" of top dress mulch must be installed to all areas where exposed soil is present.
- 3. A complete agronomic soils test must be performed prior to planting & the recommended amendments reviewed by the landscape architect of record prior to planting. The test must include pH, prganinc matter percentage, infilatration rate and a complete chemical analysis (NH4, NO3, N, P, K, Ca, Mg, SO4, Na, B, Cu, Zn, Mn, Fe). The following test are also recommended: total exchange capacity (TEC), effective cation exchange (ECe) & sodium absorption ratio (SAR). Waypoint Analytical and Wallace Laboratories are sources for this test.
- 4. The soil prep must include, at a minimum, 4 cubic yards of compost/1000SF incorporate to a depth of 6 inches into the soil.
- 5. At the time of completion of the installation, a certificate of completion, using the City's form and signed by the licensed professional who prepared the landscape plans, will be required. The following must be submitted with the certification f completion form:
- 5.1. A copy of the agronomic soils report.
- 5.2. A maintenance schedule for planting & irrigation.
- 5.3. An irrigation schedule that delineates irrigation times and water usage consistent with the approved plan's estimated total water use (ETWU) and current Santa Fe Irrigation District Requirements.

The Applicant, Noylan Dunn Pulaski, is requesting City Council approval of a Development Review Permit (DRP) and Structure Development Permit (SDP) to demolish a single-family residence, construct a replacement two-story, single-family residence including an attached garage, convert an existing detached accessory structure to an Accessory Dwelling Unit (ADU) and perform associated site improvements at 840 Hernandez Street. The 7,856 square-foot lot is located within the Medium High Residential (MHR) Zone.

The project proposes a main floor living area of 1,971 square feet, an attached garage of 460 square feet, a second floor living area of 1,038 square feet, and to maintain an existing detached single-family residence onsite. The project would include grading in the amounts of 20.43 yd³ cut, 3.53 yd³ of fill and 16.9 yd³ of export. The tallest point of the proposed residence would be 24.75 feet above the proposed grade and the highest point of the structure would not exceed 92.22 feet above Mean Sea Level (MSL). The project requires a DRP for 1) a structure that exceeds 60 percent of the maximum allowable floor area; and 2) for a second floor that exceeds 35% of the floor area of the first floor. The project requires a SDP because the proposed development exceeds 16 feet in height above existing grade.

The issue before the Council is whether to approve, approve with conditions, or deny the Applicant's request as contained in Resolution 2021-003 (Attachment 1).

CITY COUNCIL ACTION:		

DISCUSSION:

The subject property is located on the north side of Hernandez Street, one property west of the intersection of Hernandez Street and Castro Street. The lot is rectangular in shape with 60 feet of frontage along Hernandez Street and a lot depth of approximately 139 feet. The existing topography is generally flat but gradually slopes upward from west to east approximately 11 feet across the width of the property. With the proposed project, the driveway would be widened in the existing location toward the southeast corner of the lot. The Applicant proposes to maintain the existing topography of the lot except for an area in the southwest corner of the lot in order to provide the necessary stormwater bio-filtration basin. The project plans are provided in Attachment 2.

Table 1 (below) provides a comparison of the Solana Beach Municipal Code (SBMC) applicable zoning regulations with the Applicant's proposed design.

Staff has prepared draft findings for approval of the project in the attached Resolution 2021-003 for Council's consideration based upon the information in this report. The applicable SBMC sections are provided in italicized text and conditions from the Community Development, Engineering, and Fire Departments are incorporated in the Resolution of Approval. The Council may direct Staff to modify the Resolution to reflect the findings and conditions it deems appropriate as a result of the Public Hearing process.

If the Council determines the project is to be denied, Staff will prepare a Resolution of Denial for adoption at a subsequent Council meeting.

The following is a discussion of the findings for a DRP and SDP as each applies to the proposed project as well as references to recommended conditions of approval contained in Resolution 2021-003.

Development Review Permit Compliance (SBMC Section 17.68.40):

A DRP is required for the following reasons: 1) for a structure that exceeds 60% of the maximum allowable floor area; and 2) for a second floor that exceeds 35% of floor area of the first floor.

In addition to meeting zoning requirements, the project must also be found in compliance with development review criteria. The following is a list of the development review criteria topics:

- 1. Relationship with Adjacent Land Uses
- 2. Building and Structure Placement
- 3. Landscaping
- 4. Roads, Pedestrian Walkways, Parking, and Storage Areas
- 5. Grading
- 6. Lighting
- 7. Usable Open Space

The Council may approve, or conditionally approve, a DRP only if all of the findings listed below can be made. Resolution 2021-003 provides the full discussion of the findings.

- 1. The proposed development is consistent with the general plan and all applicable requirements of the zoning ordinance including special regulations, overlay zones, and specific plans.
- 2. The proposed development complies with the development review criteria.
- All required permits and approvals issued by the city, including variances, conditional use permits, comprehensive sign plans, and coastal development permits have been obtained prior to or concurrently with the development review permit.
- 4. If the development project also requires a permit or approval to be issued by a state or federal agency, the city council may conditionally approve the development review permit upon the Applicant obtaining the required permit or approval from the other agency.

If the above findings cannot be made, the Council shall deny the DRP. The following is a discussion of the applicable development review criteria as they relate to the proposed project.

Relationship with Adjacent Land Uses:

The property is located within the MHR Zone. Properties to the north, east, and west are also located within the MHR Zone. Properties to the south are located within the High Residential (HR) Zone. The surrounding properties are developed with one and two-story, single-family residences as well as some that have multiple dwelling units.

The project, as designed, is consistent with the permitted uses for the MHR Zone as described in SBMC Sections 17.20.010 and 17.12.020. The property is designated Medium High Density Residential in the General Plan and intended for multi-family residential development within a density range of eight to twelve units per acre. Other compatible uses such as accessory dwelling units, home occupations, religious institutions, educational institutions, parks and recreation facilities, and public utilities are permitted or conditionally permitted. The proposed development could be found to be consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods, and the rehabilitation of deteriorated neighborhoods.

The property is not located within any of the City's Specific Plan areas; however, it is located within the boundaries the of Coastal Zone. As a condition of project approval, the Applicant would be required to obtain a Coastal Development Permit, Waiver or Exemption from the California Coastal Commission prior to the issuance of Building or Grading Permits.

Building and Structure Placement:

The Applicant is proposing to construct a replacement two-story, single-family residence with an attached garage and to convert an existing detached accessory structure to an ADU. The replacement residence, as designed, would be located within the buildable area which meets or exceeds the required setbacks of 25 feet for the front yard setback, five feet on each side and 25 feet for the rear yard setback.

The existing detached accessory structure consists of a single story with 738 square feet including a kitchen and living area, two bedrooms and a bathroom. The existing detached accessory structure was constructed with required permits prior to the City's incorporation. The detached structure was constructed without required parking and encroaches into the rear and side yard setbacks required under the SBMC. The City's ADU ordinance allows for conversion of existing structures to an accessory dwelling unit in the same location as the existing structure. Any additions to the existing accessory structure would need to comply with a minimum four-foot setback from the rear and side property lines. Additionally, the Municipal Code states the following regarding nonconforming structures:

Where a nonconforming structure exists on a lot (including an accessory structure on a residential lot), additional uses, structures, or structural internal and external additions may be established on the lot; provided such

January 13, 2021 DRP/SDP 17-18-13 Dunn Pulaski Residence Page 5 of 11

additional uses, structures, or structural additions do not increase the size or degree of the existing nonconformity.

The Applicant is not proposing to modify the existing detached ADU except to remove an existing bay window area between the ADU and the proposed residence. Therefore, the Applicant is allowed to maintain the existing nonconformities and to utilize it as an ADU. Additionally, because the property is located within ½ mile walking distance of a public transit stop, no off-street parking for the ADU is required.

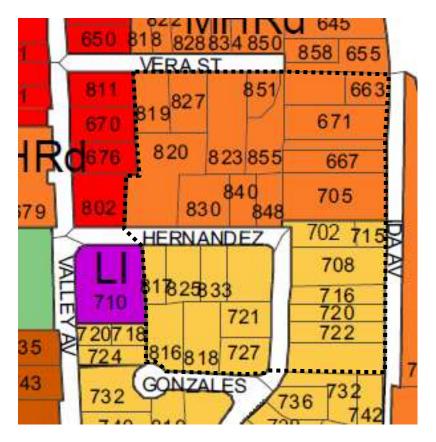

The floor area proposed for the residence includes: a 460 square-foot attached garage, a 1,971 square foot first floor living area consisting of an entry area, powder room, laundry room, open kitchen/dining/living room, two bedrooms with a Jack and Jill bathroom, an additional bedroom with attached bathroom, as well as a staircase that leads to the second floor. The proposed 1,038 square foot second floor would consist of a master suite and a sitting area. The total square footage onsite including the attached garage and the detached accessory structure would be 4,207 square feet.

SBMC 17.20.030 indicates that required parking spaces up to 200 square feet per space can be exempt from the calculation of FAR if provided within a garage. 400 square feet of garage area is exempt from the calculation of floor area. Therefore, the total proposed Floor Area for the project is 3,807, which is 2,085 square feet below the maximum allowable floor area for the property.

The proposed project, as designed, meets the minimum required setbacks and is below the maximum allowable floor area for the property.

Neighborhood Comparison:

Staff compared the proposed project to 30 other properties within the surrounding area. This area includes properties along the south side of Vera Street, the south side of Hernandez Street, the west side of Ida Avenue and the east and west sides of Castro Street as shown on the following map:

The properties evaluated in this comparison are located in the MR and MHR Zones. It should be noted that the properties within the MHR zone are subject to the same FAR as the subject property, which is 0.75 of the lot area. The properties that are in the MR zone are also in the Scaled Residential Overlay Zone (SROZ) and have a tiered maximum FAR based on the lot area. The existing homes range in size from 570 square feet to 14,338 square feet, according to the County Assessor records. It should be noted that the County Assessor does not include the garage, covered porch area, unfinished basement, or accessory building area in the total square footage. Accordingly, the building area of the proposed project has been calculated for comparison purposes by deleting the area of the proposed garages, the covered porch, and ceiling height over 15 feet as follows:

Project Gross Building Area:	4,207 ft ²
Delete ADU Square Footage	-738 ft ²
Delete Partially Subterranean Garage:	- 460 ft ²
Project Area for Comparison to Assessor's Data:	3,009 ft ²

Table 2 is based upon the County Assessor's data and SanGIS data. It contains neighboring lot sizes, the square footage of existing development and the maximum allowable square footage for potential development on each lot.

Fences, Walls and Retaining Walls:

Within the front yard setback area, the SBMC Section 17.20.040(O) allows fences and walls, or any combination thereof, to be no higher than 42 inches in height as measured

January 13, 2021 DRP/SDP 17-18-13 Dunn Pulaski Residence Page 8 of 11

from existing grade, except for an additional two feet of fence that is at least 80% open to light. Fences, walls and retaining walls located within the rear and interior side yards are allowed to be up to six feet in height with an additional 24 inches that is 50% open to light and air.

The Applicant is proposing to maintain an existing retaining wall and fence along the northern property line and is proposing to construct a 6 foot fence between the ADU and the proposed residence to provide a separate yard area for each dwelling. The proposed fence, as designed, is in compliance with the maximum building heights for walls as measured from the existing grade.

Landscape:

The project is not subject to the current water efficient landscaping regulations of SBMC Chapter 17.56. A Landscape Documentation Package is required for new development projects with an aggregate landscape equal to or greater than 500 square feet requiring a building permit, plan check or development review. As a condition of project approval, the Applicant would be required to return to the City Council with a DRP/SDP modification with a landscape plan in compliance with the water efficient landscape regulations if more than 500 square feet of landscaping is disturbed.

Parking:

SBMC Section 17.52.040 and the Off-Street Parking Design Manual (OSPDM) require two (2) parking spaces for a single-family residence. The Applicants would maintain the existing location of the driveway in the southeast corner of the lot, however, it would be widened to match the width of the proposed garage. SBMC Section 17.08.030 indicates that required parking up to 200 square feet per parking space provided in a garage is exempt from the floor area calculation. The proposed garage will provide two parking spaces. Two spaces are required, therefore, 400 square feet of garage area is exempt from the project's floor area calculation. The Applicant is not required to provide parking for the proposed ADU as it is part of an existing accessory structure and is located within ½ mile of a public transit stop.

Grading:

The project includes grading in the amount 20.43 yd³ cut, 3.53 yd³ of fill and 16.9 yd³ of export. The grading is proposed in order to modify the existing driveway and to provide the necessary stormwater bio-filtration basing for the proposed development.

Lighting:

A condition of project approval requires that all new exterior lighting fixtures comply with the City-Wide Lighting Regulations of the Zoning Ordinance (SBMC 17.60.060). All light fixtures shall be shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding area.

Usable Open Space:

The project consists of the construction of a replacement two-story, single-family residence and an ADU; therefore, usable open space and recreational facilities are neither proposed nor required according to SBMC Section 17.20.040. The Applicant will be required, as a condition of approval, to pay the applicable Park Development Fee.

Structure Development Permit Compliance:

The proposed structure exceeds 16 feet in height above the pre-existing grade; therefore, the project must comply with all of the View Assessment requirements of SBMC Chapter 17.63 and the Applicant was required to complete the SDP process. Originally, the project was designed to include a new two-story duplex with separate condominium ownership and common ownership of the remainder of the lot. The Applicant had story poles erected onsite. A final Story Pole Height Certification was issued by a licensed land surveyor on August 27, 2019, which showed the highest story pole certified at 92.22 MSL and 24.75 feet above the proposed grade. Notices to apply for View Assessment were mailed to property owners and occupants within 300 feet of the project site, which established a deadline to file for View Assessment on May 16, 2019. Four applications for View Assessment were received by the City. The project was heard at the October 15, 2019 View Assessment Committee meeting. At that meeting, the VAC heard presentations from both the Applicant and Claimants and was not able to make the required findings to recommend approval of the project and voted to continue the project to allow the Applicant time to work with the Claimants and redesign the project. The project was redesigned to the current proposal. As a result of the project changes, the City received requests to withdraw the applications for View Assessment from three of the neighbors. The fourth neighbor sold their property while the project was being redesigned so their application is no longer valid. Therefore, if the Council is able to make the required findings to approve the DRP, the SDP would be approved administratively.

As a condition of approval, a height certificate prepared by a licensed land surveyor will be required prior to the framing inspection certifying that the tallest point of the proposed residence will not exceed 24.75 feet above the proposed grade and the highest point of the structure will not exceed 92.20 feet above the Mean Sea Level (MSL).

Public Hearing Notice:

Notice of the City Council Public Hearing for the project was published in the Union Tribune more than 10 days prior to the public hearing. The same public notice was mailed to property owners and occupants within 300 feet of the proposed project site on December 18, 2020. As of the date of preparation of this Staff Report, Staff has not received any official correspondence.

In conclusion, the proposed project, as conditioned, could be found to be consistent with the Zoning regulations and the General Plan. Staff has prepared draft findings for

January 13, 2021 DRP/SDP 17-18-13 Dunn Pulaski Residence Page 10 of 11

approval of the project in the attached Resolution 2021-003 for Council's consideration based upon the information in this report. Conditions from the Community Development, Engineering, and Fire Departments are incorporated in the Resolution of Approval.

Should the Council determine that the findings can be made to approve the project; the SDP will be approved concurrently with the DRP. The Council may direct Staff to modify the Resolution to reflect the findings and conditions it deems appropriate as a result of the Public Hearing process. If the Council determines the project is to be denied, Staff will prepare a Resolution of Denial for adoption at a subsequent Council meeting.

CEQA COMPLIANCE STATEMENT:

The project is exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15303 of the State CEQA Guidelines. Class 3 consists of construction and location of limited numbers of new, small facilities or structures. Examples of this exemption include one single-family residence or second dwelling unit in a residential zone. In urbanized areas, up to three-single-family residences may be constructed or converted under this exemption.

FISCAL IMPACT: N/A

WORK PLAN: N/A

OPTIONS:

- Approve Staff recommendation adopting the attached Resolution 2021-003.
- Approve Staff recommendation subject to additional specific conditions necessary for the City Council to make all required findings for the approval of a DRP and SDP.
- Deny the project if all required findings for the DRP cannot be made.

DEPARTMENT RECOMMENDATION:

The proposed project meets the minimum zoning requirements under the SBMC, may be found to be consistent with the General Plan and may be found, as conditioned, to meet the discretionary findings required as discussed in this report to approve a DRP and SDP. Therefore, Staff recommends that the City Council:

- 1. Conduct the Public Hearing: Open the Public Hearing, Report Council Disclosures, Receive Public Testimony, and Close the Public Hearing.
- 2. Find the project exempt from the California Environmental Quality Act pursuant to Section 15303 of the State CEQA Guidelines; and
- 3. If the City Council makes the requisite findings and approves the project, adopt Resolution 2021-003 conditionally approving a DRP and SDP to demolish an existing one-story, single-family residence and construct a replacement two-story, single-family residence with an attached two-car garage and convert an existing

APPLICANTS: NOYLAN DUNN PULASKI APPLICATION: 17-18-13 DRP/SDP

WHEREAS, Noylan Dunn Pulaski (hereinafter referred to as "Applicant"), has submitted an application for a Development Review Permit (DRP) and Structure Development Permit (SDP) pursuant to Title 17 (Zoning) of the Solana Beach Municipal Code (SBMC); and

WHEREAS, the Public Hearing was conducted pursuant to the provisions of Solana Beach Municipal Code Section 17.72.030; and

WHEREAS, at the Public Hearing on January 13, 2021, the City Council received and considered evidence concerning the proposed application; and

WHEREAS, the City Council of the City of Solana Beach found the application request exempt from the California Environmental Quality Act pursuant to Section 15303 of the State CEQA Guidelines; and

WHEREAS, this decision is based upon the evidence presented at the hearing, and any information the City Council gathered by viewing the site and the area as disclosed at the hearing.

NOW THEREFORE, the City Council of the City of Solana Beach, California, does resolve as follows:

- I. That the foregoing recitations are true and correct.
- II. That the request for a DRP and SDP to demolish an existing single-family residence and construct a replacement two-story, single-family residence with an attached garage, convert an existing detached accessory structure to an Accessory Dwelling Unit (ADU), and perform associated site improvements at 840 Hernandez Street, is conditionally approved based upon the following Findings and subject to the following Conditions:

III. FINDINGS

A. In accordance with Section 17.68.040 (Development Review Permit) of the

City of Solana Beach Municipal Code, the City Council finds the following:

I. The proposed project is consistent with the General Plan and all applicable requirements of SBMC Title 17 (Zoning Ordinance), including special regulations, overlay zones and specific plans.

General Plan Consistency: The project, as conditioned, is consistent with the City's General Plan designation of Medium High Density Residential, which allows for a maximum of 8 to 12 dwelling units per acre. The development is also consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods, and the rehabilitation of deteriorated neighborhoods.

Zoning Ordinance Consistency: The project is consistent with all applicable requirements of the Zoning Ordinance (Title 17) (SBMC 17.20.030 and 17.48.040), which delineates maximum allowable Floor Area Ratio (FAR), Permitted Uses and Structures (SBMC Section 17.20.020) which provides for uses of the property for a single-family residence. Further, the project adheres to all property development regulations established for the Medium High Residential (MHR) Zone and cited by SBMC Section 17.020.030.

The project is consistent with the provisions for minimum yard dimensions (i.e., setbacks) and the maximum allowable Floor Area (FAR), maximum building height, and parking requirements.

- II. The proposed development complies with the following development review criteria set forth in Solana Beach Municipal Code Section 17.68.040.F:
 - a. Relationship with Adjacent Land Uses: The development shall be designed in a manner compatible with and where feasible, complimentary to existing and potential development in the immediate vicinity of the project site. Site planning on the perimeter of the development shall give consideration to the protection of surrounding areas from potential adverse effects, as well as protection of the property from adverse surrounding influences.

The property is located within the MHR Zone. Properties to the north, east, and west are also located within the MHR Zone. Properties to the south are located within the High Residential (HR) Zone. The surrounding properties are developed with one and two-story, single-family residences as well as some that have multiple dwelling units.

Resolution 2021-003 17-18-13 DRP/SDP Dunn Pulaski- 840 Hernandez Ave. Page 3 of 11

The project, as designed, is consistent with the permitted uses for the MHR Zone as described in SBMC Sections 17.20.010 and 17.12.020. The property is designated Medium High Density Residential in the General Plan and intended for multi-family residential development within a density range of eight to twelve units per acre. Other compatible uses such as accessory dwelling units, home occupations, religious institutions, educational institutions, parks and recreation facilities, and public utilities are permitted or conditionally permitted. The proposed development could be found to be consistent with the objectives of the General Plan as it encourages the development and maintenance of healthy residential neighborhoods, the stability of transitional neighborhoods, and the rehabilitation of deteriorated neighborhoods.

The property is not located within any of the City's Specific Plan areas; however, it is located within the boundaries of the Coastal Zone. As a condition of project approval, the Applicant would be required to obtain a Coastal Development Permit, Waiver or Exemption from the California Coastal Commission prior to the issuance of Building or Grading Permits.

b. Building and Structure Placement: Buildings and structures shall be sited and designed in a manner which visually and functionally enhances their intended use.

The Applicant is proposing to construct a replacement two-story, single-family residence with an attached garage and to convert an existing detached accessory structure to an ADU. The replacement residence, as designed, would be located within the buildable area which meets or exceeds the required setbacks of 25 feet for the front yard setback, five feet on each side and 25 feet for the rear yard setback.

The ADU would be 738 square feet and consist of a single story with a kitchen and living area, two bedrooms and a bathroom. The detached residence was constructed without required parking and it encroaches into the required rear and side yard setbacks. The residence was constructed with required permits prior to the City's incorporation.

The Applicant is not proposing to modify the ADU except to remove an existing bay window area between the ADU and the proposed residence.

The floor area proposed for the residence includes: a 460 square-foot attached garage, a 1,971 square foot first floor living

Resolution 2021-003 17-18-13 DRP/SDP Dunn Pulaski- 840 Hernandez Ave. Page 4 of 11

area consisting of an entry area, powder room, laundry room, open kitchen/dining/living room, two bedrooms with a Jack and Jill bathroom, an additional bedroom with attached bathroom, as well as a staircase that leads to the second floor. The proposed 1,038 square foot second floor would consist of a master suite and a sitting area. The total square footage onsite including the attached garage and the detached accessory structure would be 4,207 square feet.

SBMC 17.20.030 indicates that required parking spaces up to 200 square feet per space can be exempt from the calculation of FAR if provided within a garage. 400 square feet of garage area is exempt from the calculation of floor area. Therefore, the total proposed Floor Area for the project is 3,807, which is 2,085 square feet below the maximum allowable floor area for the property.

The proposed project, as designed, meets the minimum required setbacks and is below the maximum allowable floor area for the property.

c. Landscaping: The removal of significant native vegetation shall be minimized. Replacement vegetation and landscaping shall be compatible with the vegetation of the surrounding area. Trees and other large plantings shall not obstruct significant views when installed or at maturity.

The project is not subject to the current water efficient landscaping regulations of SBMC Chapter 17.56. A Landscape Documentation Package is required for new development projects with an aggregate landscape equal to or greater than 500 square feet requiring a building permit, plan check or development review. As a condition of project approval, the Applicant would be required to return to the City Council with a DRP/SDP modification with a landscape plan in compliance with the water efficient landscape regulations if more than 500 square feet of landscaping is disturbed.

d. Roads, Pedestrian Walkways, Parking and Storage Areas: Any development involving more than one building or structure shall provide common access roads and pedestrian walkways. Parking and outside storage areas, where permitted, shall be screened from view, to the extent feasible, by existing topography, by the placement of buildings and structures, or by landscaping and plantings.

Resolution 2021-003 17-18-13 DRP/SDP Dunn Pulaski- 840 Hernandez Ave. Page 5 of 11

SBMC Section 17.52.040 and the Off-Street Parking Design Manual (OSPDM) require two (2) parking spaces for a single-family residence. The Applicants would maintain the existing location of the driveway in the southeast corner of the lot, however, it would be widened to match the width of the proposed garage. SBMC Section 17.08.030 indicates that required parking up to 200 square feet per parking space provided in a garage is exempt from the floor area calculation. The proposed garage will provide two parking spaces. Two spaces are required, therefore, 400 square feet of garage area is exempt from the project's floor area calculation. The Applicant is not required to provide parking for the ADU as it is part of an existing accessory structure.

e. Grading: To the extent feasible, natural topography and scenic features of the site shall be retained and incorporated into the proposed development. Any grading or earth-moving operations in connection with the proposed development shall be planned and executed so as to blend with the existing terrain both on and adjacent to the site. Existing exposed or disturbed slopes shall be landscaped with native or naturalized non-native vegetation and existing erosion problems shall be corrected.

The project includes grading in the amount 20.43 yd3 cut, 3.53 yd3 of fill and 16.9 yd3 of export. The grading is proposed in order to modify the existing driveway and to provide the necessary stormwater bio-filtration basing for the proposed development.

f. Lighting: Light fixtures for walkways, parking areas, driveways, and other facilities shall be provided in sufficient number and at proper locations to assure safe and convenient nighttime use. All light fixtures shall be appropriately shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding areas per SBMC 17.60.060 (Exterior Lighting Regulations).

A condition of project approval includes that all new exterior lighting fixtures comply with the City-Wide Lighting Regulations of the Zoning Ordinance (SBMC 17.60.060). All light fixtures shall be shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding area.

g. Usable Open Space: Recreational facilities proposed within required usable open space shall be located and designed to maintain essential open space values.

The project consists of the construction of a replacement twostory, single-family residence and an ADU; therefore, usable open space and recreational facilities are neither proposed nor required according to SBMC Section 17.20.040. The Applicant will be required, as a condition of approval, to pay the applicable Park Development Fee.

III. All required permits and approvals including variances, conditional use permits, comprehensive sign plans, and coastal development permits have been obtained prior to or concurrently with the development review permit.

All required permits, including a Structure Development Permit, are being processed concurrently with the Development Review Permit.

IV. If the development project also requires a permit or approval to be issued by a state or federal agency, the city council may conditionally approve the development review permit upon the Applicant obtaining the required permit or approval from the other agency.

The Applicant is required to obtain approval from the California Coastal Commission prior to issuance of Building Permits.

B. In accordance with Section 17.63.040 (Structure Development Permit) of the Solana Beach Municipal Code, the City Council finds the following:

The proposed structure exceeds 16 feet in height above the pre-existing grade; therefore, the project must comply with all of the View Assessment requirements of SBMC Chapter 17.63 and the Applicant was required to complete the SDP process. Originally, the project was designed to include a new two-story duplex with separate condominium ownership and common ownership of the remainder of the lot. The Applicant had story poles erected onsite. A final Story Pole Height Certification was issued by a licensed land surveyor on August 27, 2019, which showed the highest story pole certified at 92.22 MSL and 24.75 feet above the proposed grade. Notices to apply for View Assessment were mailed to property owners and occupants within 300 feet of the project site, which established a deadline to file for View Assessment on May 16, 2019. Four applications for View Assessment were received by the City. The project was heard at the October 15, 2019 View Assessment Committee meeting. At that meeting, the VAC heard presentations from both the Applicant and Claimants and was not able to make the required findings to recommend approval of the project and voted to continue the project to allow the Applicant time to work with the Claimants and redesign the project. The project was redesigned to the current proposal. The City received requests to withdraw the applications for View Assessment from three of the neighbors. The fourth neighbor sold their property while the project was being redesigned so their application is no longer valid.

Therefore, if the Council is able to make the required findings to approve the DRP, the SDP would be approved administratively.

As a condition of approval, a height certificate prepared by a licensed land surveyor will be required prior to the framing inspection certifying that the tallest point of the proposed residence will not exceed 24.75 feet above the proposed grade and the highest point of the structure will not exceed 92.20 feet above the Mean Sea Level (MSL).

IV. CONDITIONS

Prior to use or development of the property in reliance on this permit, the Applicant shall provide for and adhere to the following conditions:

- A. Community Development Department Conditions:
 - I. The Applicant shall pay required Fire Mitigation, Park Development, Public Use Facilities, and Public Facilities Impact Fees.
 - II. Building Permit plans must be in substantial conformance with the architectural plans presented to the City Council on January 13, 2021, and located in the project file with a submittal date of December 17, 2020.
 - III. Prior to requesting a framing inspection, the Applicant shall submit a height certificate prepared by a licensed land surveyor prior to the framing inspection certifying that the tallest point of the proposed residence will not exceed 24.75 feet above the proposed grade on the west elevation and the highest point of the structure will not exceed 92.22 feet above the Mean Sea Level (MSL) in conformance with the plans as approved by the City Council on January 13, 2021.
 - IV. Any proposed onsite fences, walls and retaining walls and any proposed railing located on top, or any combination thereof, shall comply with applicable regulations of SBMC Section 17.20.040 and 17.60.070 (Fences and Walls).
 - V. The Applicant shall obtain required California Coastal Commission (CCC) approval of a Coastal Development Permit, Waiver or Exemption as determined necessary by the CCC, prior to the issuance of Building and Grading Permits.
 - VI. The Applicant shall provide a full Landscape Documentation Package in compliance with SBMC Chapter 17.56 prior to Grading Permit issuance, which will be reviewed and inspected by the City's third party landscape professional.

Resolution 2021-003 17-18-13 DRP/SDP Dunn Pulaski- 840 Hernandez Ave. Page 8 of 11

- VII. Native or drought tolerant and non-invasive plant materials and water conserving irrigation systems shall be incorporated into any proposed landscaping and compatible with the surrounding area to the extent feasible.
- VIII. All new exterior lighting fixtures shall be in conformance with the Citywide lighting regulations of the Zoning Ordinance (SBMC 17.60.060). All light fixtures shall be appropriately shielded so that no light or glare is transmitted or reflected in such concentrated quantities or intensities as to be detrimental to the surrounding area.
- IX. Construction vehicles shall be parked on the subject property at all times feasible. If construction activity prohibits parking on the subject property, the Applicant shall ensure construction vehicles are parked in such a way to allow sufficient vehicular access on the street and minimize impact to the surrounding neighbors.
- X. The Applicant shall connect to temporary electrical service as soon as feasible to the satisfaction of the City. The use of gas-powered generator(s) during construction activity is discouraged and shall be limited only to selective use at the discretion of the City.

B. Fire Department Conditions:

- I. ACCESS ROAD MINIMUM DIMENSIONS: Fire apparatus access roads shall have an unobstructed improved width of not less than 20 feet; curb line to curb line, and an unobstructed vertical clearance of not less than 13 feet 6 inches. Exception: Single-Family residential driveways; serving no more than two single-family dwellings, shall have minimum of 16 feet, curb line to curb line, of unobstructed improved width. Access roads shall be designed and maintained to support the imposed loads of not less than 75,000 pounds and shall be provided with an approved paved surface to provide all-weather driving capabilities.
- II. POSTING OR STRIPING ROADWAYS "NO PARKING FIRE LANE": Fire Department access roadways, when required, shall be properly identified as per Solana Beach Fire Department standards. The means by which fire lanes are designated shall be maintained in a clean and legible condition at all times and be replaced or repaired when necessary to provide adequate visibility.
- III. OBSTRUCTION OF ROADWAYS DURING CONSTRUCTION: All roadways shall be a minimum of 20 feet in width during construction and maintained free and clear, including the parking of vehicles, in accordance with the California Fire Code and the Solana Beach Fire

Department.

- IV. ADDRESS NUMBERS: STREET NUMBERS: Approved numbers and/or addresses shall be placed on all new and existing buildings and at appropriate additional locations as to be plainly visible and legible from the street or roadway fronting the property from either direction of approach. Said numbers shall contrast with their background, and shall meet the following minimum standards as to size: 4" high with a ½" inch stroke width for residential buildings, 8" high with a ½" stroke for commercial and multi-family residential buildings, 12" high with a 1" stroke for industrial buildings. Additional numbers shall be required where deemed necessary by the Fire Marshal, such as rear access doors, building corners, and entrances to commercial centers.
- V. AUTOMATIC FIRE SPRINKLER SYSTEM-ONE AND TWO FAMILY DWELLINGS: Structures shall be protected by an automatic fire sprinkler system designed and installed to the satisfaction of the Fire Department. Plans for the automatic fire sprinkler system shall be approved by the Fire Department prior to installation.
- VI. CLASS "A" ROOF: All structures shall be provided with a Class "A" Roof covering to the satisfaction of the Solana Beach Fire Department.

C. Engineering Department Conditions:

- I. The Applicant must recognize that approval of the project consisting of construction of a fence separating the existing structure for the proposed residence does not constitute a subdivision for the purpose of selling, leasing or financing. Such purposes would require the Applicant to process a Subdivision Tentative Map.
- II. Prior to occupancy/final inspection of the Building Permit, an easement shall be recorded for maintenance of the detention basins by the property owner(s) in perpetuity.
- III. The Applicant shall record a Hold Harmless Agreement prior to Final Inspection of the Building Permit. The document will hold the City of Solana Beach harmless in case of a sanitary sewer backup due to a blockage in the public sewer main. A backflow prevention device shall be installed on private property. The Applicant shall record the Hold Harmless Agreement document prior to Final Inspection of the Building Permit.
- IV. All construction demolition materials shall be recycled according to the City's Construction and Demolition recycling program and an approved Waste Management Plan shall be submitted.

V. Construction fencing shall be located on the subject property unless the Applicant has obtained an Encroachment Permit in accordance with chapter 11.20 of the SBMC which allows otherwise.

I. ENFORCEMENT

Pursuant to SBMC 17.72.120(B) failure to satisfy any and all of the above-mentioned conditions of approval is subject to the imposition of penalties as set forth in SBMC Chapters 1.1.6 and 1.18 in addition to any applicable revocation proceedings.

II. EXPIRATION

The Development Review Permit and Structure Development Permit for the project will expire 24 months from the date of this Resolution, unless the Applicants has obtained building permits and has commenced construction prior to that date, and diligently pursued construction to completion. An extension of the application may be granted by the City Council according to SBMC 17.72.110.

III. INDEMNIFICATION AGREEMENT

The Applicant shall defend, indemnify, and hold harmless the City, its agents, officers, and employees from any and all claims, actions, proceedings, damages, judgments, or costs, including attorney's fees, against the City or its agents, officers, or employees, relating to the issuance of this permit including, but not limited to, any action to attack, set aside, void, challenge, or annul this development approval and any environmental document or decision. The City will promptly notify the Applicant of any claim, action, or proceeding. The City may elect to conduct its own defense, participate in its own defense, or obtain independent legal counsel in defense of any claim related to this indemnification. In the event of such election, the Applicant shall pay all of the costs related thereto, including without limitation reasonable attorney's fees and costs. In the event of a disagreement between the City and Applicant regarding litigation issues, the City shall have the authority to control the litigation and make litigation related decisions, including, but not limited to, settlement or other disposition of the matter. However, the Applicant shall not be required to pay or perform any settlement unless such settlement is approved by the Applicant.

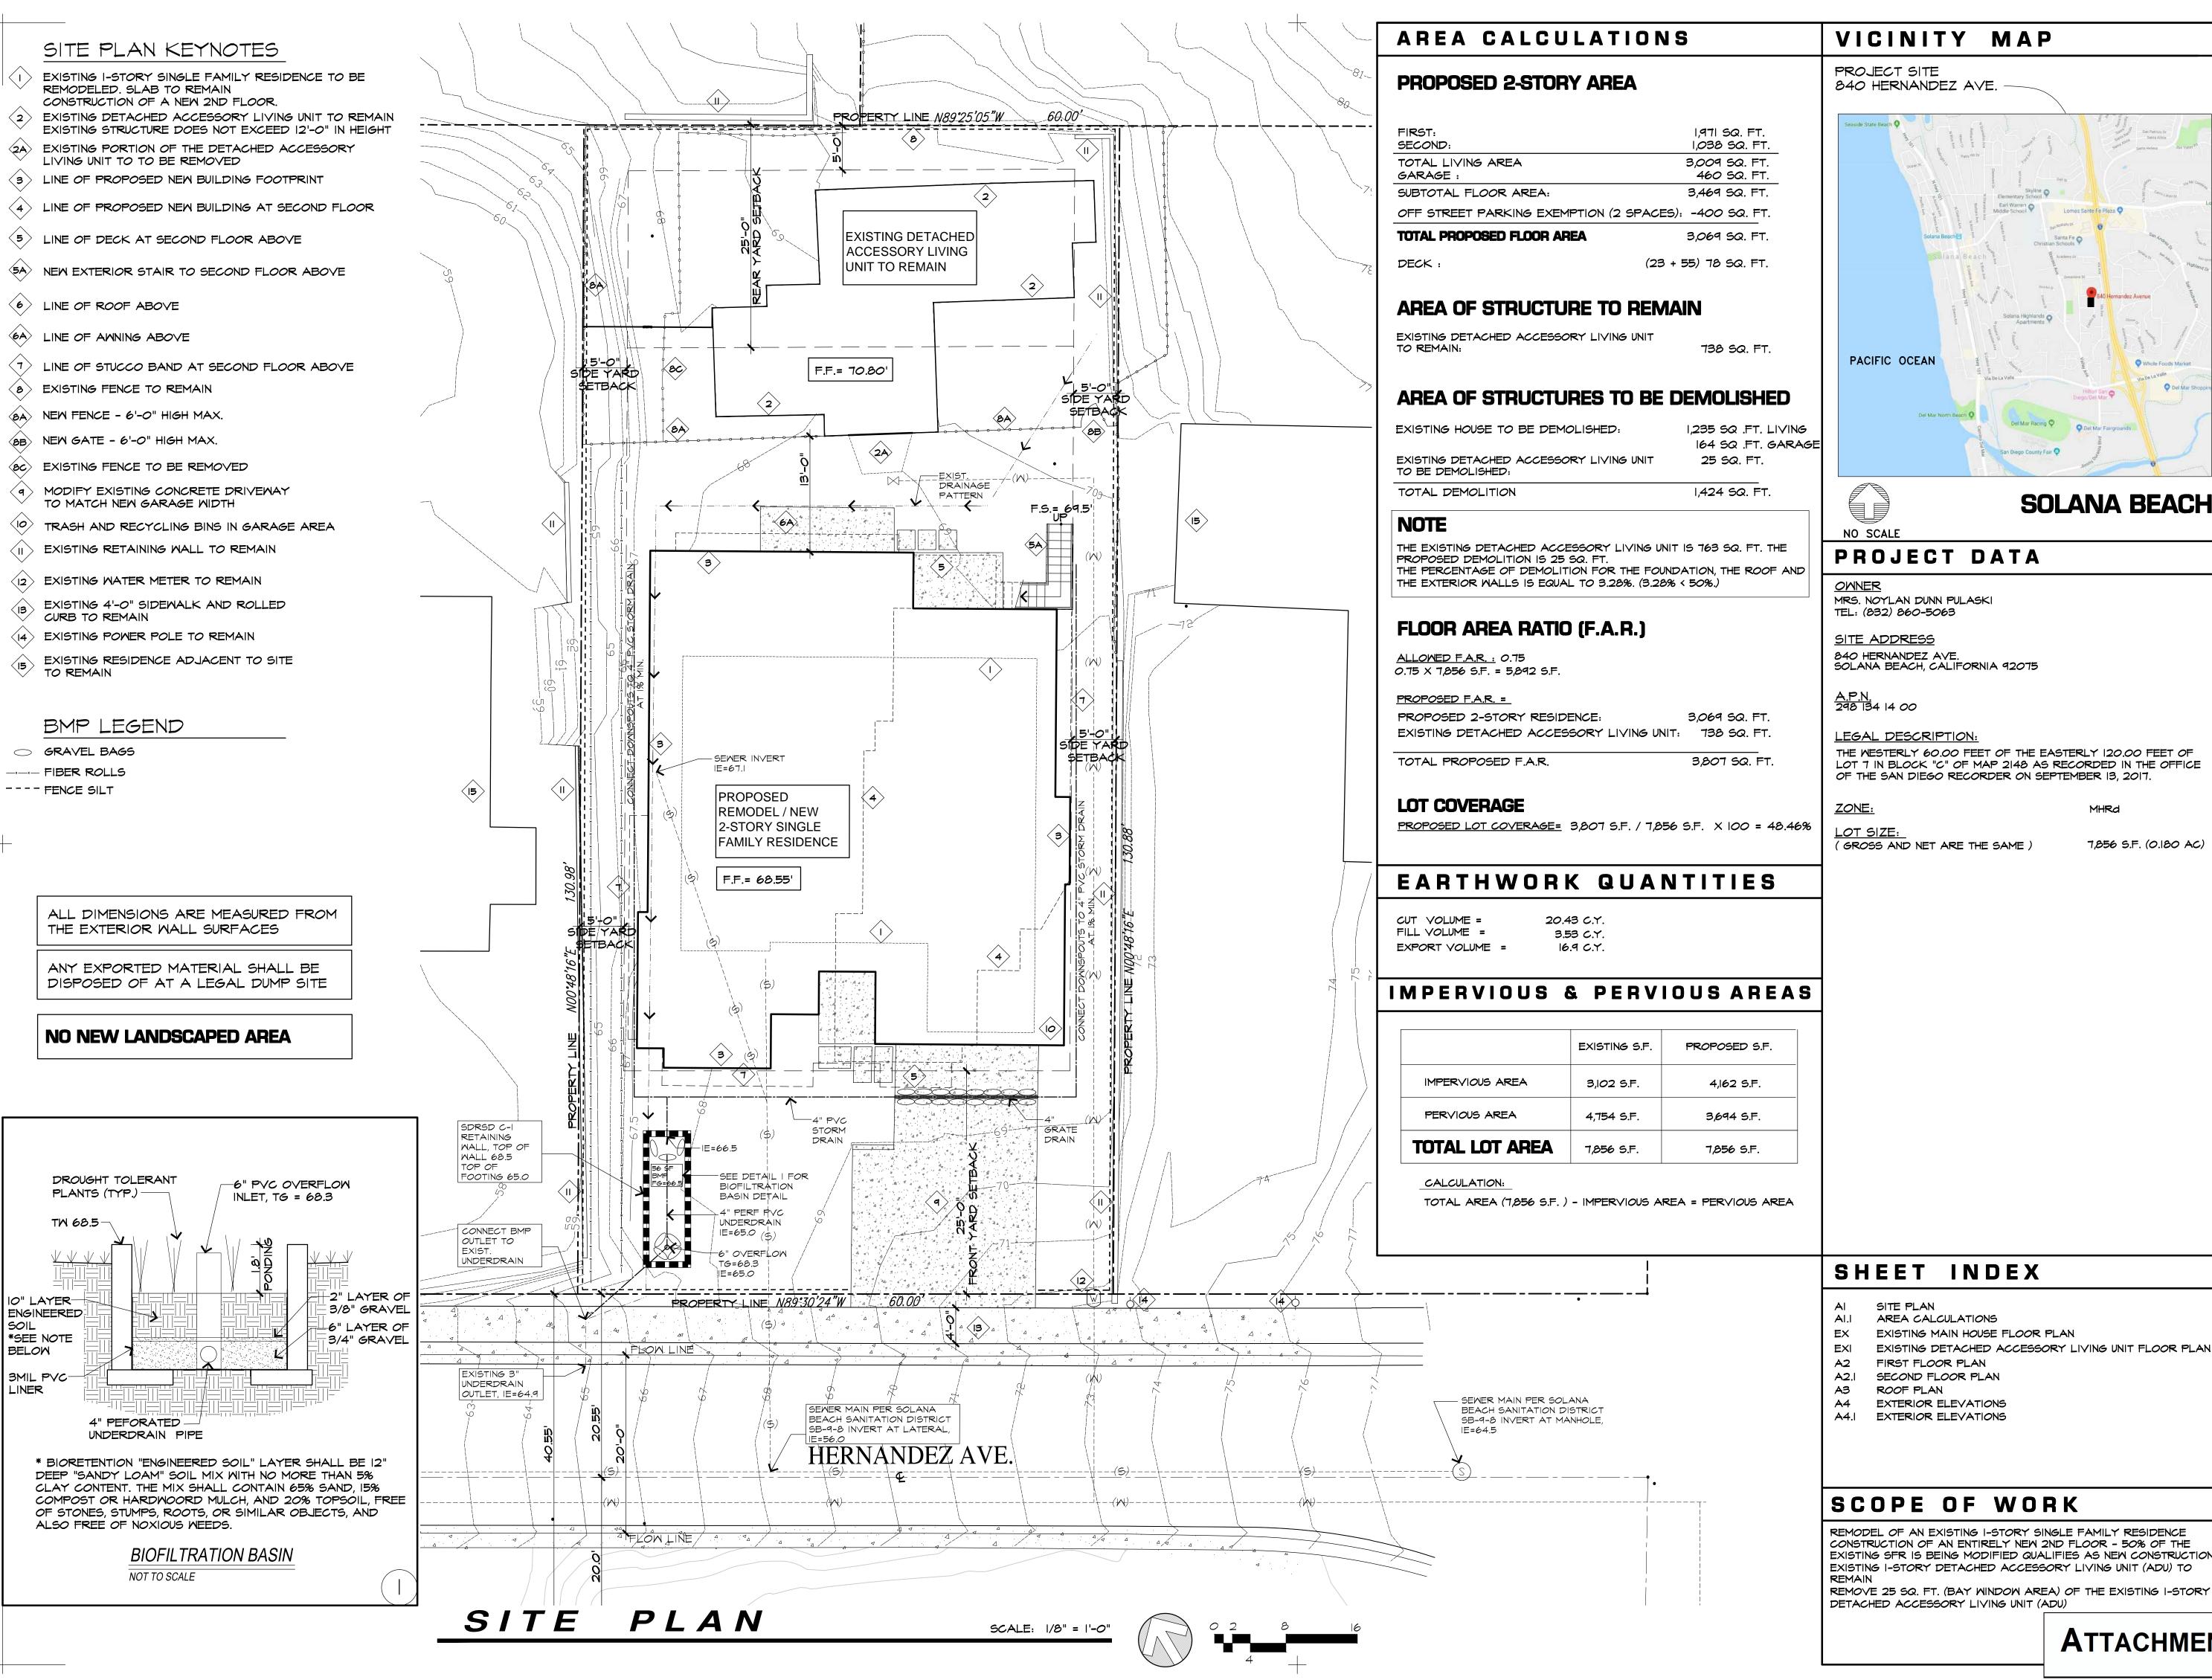

NOTICE TO APPLICANTS: Pursuant to Government Code Section 66020, you are hereby notified that the 90-day period to protest the imposition of the fees, dedications, reservations or other exactions described in this resolution commences on the effective date of this resolution. To protest the imposition of any fee, dedications, reservations or other exactions described in this resolution you must comply with the provisions of Government Code Section 66020. Generally the resolution is effective upon expiration of the tenth day following the date of adoption of this resolution, unless the resolution is appealed or called for review as provided in the Solana Beach Zoning

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers

FROM: Gregory Wade, City Manager

MEETING DATE: January 13, 2021

ORIGINATING DEPT: City Manager's Department

SUBJECT: Council Consideration of the Clean Energy Alliance

(CEA) Product Offerings and Provide Input to CEA

Board Representative

BACKGROUND:

On October 9, 2019, the City Council adopted Resolution 2019-136 approving the Joint Powers Agreement creating the Clean Energy Alliance (CEA), a new regional Community Choice Aggregation (CCA) program. CEA consists of the cities of Carlsbad, Solana Beach and Del Mar (Member Agencies) which is scheduled to launch over the months of May 2021 and June 2021. The City Council also appointed Councilmember Becker as the primary CEA Board representative. The alternate Board representative is currently vacant.

Section 6.5 Power Supply Requirements of the CEA Joint Powers Authority (JPA) Agreement establishes that the base (default) power supply product will be greater than or equal to 50% qualified renewable resources. The JPA Agreement further states that the Board shall establish product options with higher renewable and/or greenhouse gas (GHG)-free content that each Member Agency may select as their default energy product for their community. In addition to establishing the available default power supply offerings for its Member Agency to choose from, the CEA Board may establish other product offerings that individual customers may voluntarily elect as their power supply.

At its regular meeting on December 17, 2020, the CEA Board considered several options regarding the default power supply available for Member Agencies to select from as well as voluntary power supply offerings for individual customers to select from. These products include:

- Green Impact 50% Renewable Energy Product
- Clean Impact 100% Renewable Energy Product

CITY COUNCIL ACTION:			

 Local Impact – Voluntary Opt-Down Product Offering set to meet minimum state renewable requirements

In consideration of the current Solana Energy Alliance (SEA) default power supply, the CEA Board also discussed the potential to provide a product offering that met SEA's current default power supply mix of 50% renewable/75% carbon free energy.

Also at that meeting, the CEA Board requested the Board Representatives return to their respective City Councils for input on the power supply product offerings under consideration. The input will be reported back to the CEA Board at its January 21, 2021 Board meeting.

This item is before the City Council to provide input to the Council's CEA Board Representative regarding CEA's Product Offerings.

DISCUSSION:

In advance of setting rates, CEA must determine the power supply products it will offer to Member Agencies as their default as well as alternative product offerings for individual customers to select from. It is anticipated that CEA will set rates at its February 18, 2021 Board meeting and that the Member Agencies will then select the default power supply product for their community.

Green Impact - 50% Renewable Energy Product

As established in Section 6.5 of the JPA Agreement, the Green Impact product offering, with a minimum 50% Renewable Energy, is the minimum default power supply product that a Member Agency may select as the default product offering for their community. If a Member Agency selects the Clean Impact 100% Renewable Energy product as their default, the Green Impact product would be available to individual customers to select to opt down to.

Clean Impact – 100% Renewable Energy Product

The Clean Impact – 100% Renewable Energy Product offering would be available as an alternative default power supply product for Member Agencies to select from, as well as for individual customers to opt-up to in those Member Agencies where the default power supply product is the Green Impact product. The Clean Impact power supply product will be priced at a premium rate compared to Green Impact to reflect the additional cost of procuring the increased renewable power supply.

Local Impact – Minimum State Required Renewable Energy Product

The CEA Board is considering offering the Local Impact product offering as a voluntary opt-down product for individual customers to choose from. This product would not be available for a Member Agency to select as their default power supply; however, it would be available to individual customers that meet certain criteria. The criteria that the CEA Board is considering is to limit this offering to residential customers that are

enrolled in the San Diego Gas & Electric low-income qualified programs such as California Alternate Rates for Energy (CARE) or Family Electric Rate Assistance (FERA) and for small businesses. Should the CEA Board elect to offer this alternative power supply option, the specific criteria to determine eligible small businesses will be determined by the CEA as part of the rate setting process. The Local Impact power supply product would be priced at a discount rate compared to Green Impact to reflect the lower cost of the power supply.

CEQA COMPLIANCE STATEMENT:

The action being considered by the City Council is exempt from the California Environmental Quality Act (CEQA) because it is not a "project" under Section 15378(b)(5) of CEQA Guidelines.

FISCAL IMPACT:

Pursuant to the JPA Agreement, the City of Solana Beach, as well as Carlsbad and Del Mar, each contributed a \$150,000 advance to CEA to fund start-up costs of CEA. The advance is to be repaid within three years of CEA service commencement. CEA has secured financing for its remaining start up implementation and cash flow needs through a line of credit from JPMorgan. JPMorgan has indicated it will consider early repayment of the start-up advances from the member agencies. Solana Beach has no other financial commitment to CEA, and there is no financial impact incurred as a result of this action.

WORK PLAN:

Environmental Sustainability – Policy Development – Implement Solana Energy Alliance

OPTIONS:

- Approve Staff recommendation
- Do not approve Staff recommendation
- Provide alternative direction to Staff

DEPARTMENT RECOMMENDATION:

Staff recommends the City Council provide input to the CEA Board Representative regarding CEA's Product Offerings

CITY MANAGER RECOMMENDATION:

Approve Department Recommendation.

Gregory Wade, City Manager

STAFF REPORT CITY OF SOLANA BEACH

TO: Honorable Mayor and City Councilmembers

FROM: Gregory Wade, City Manager

MEETING DATE: January 13, 2021

ORIGINATING DEPT: City Clerk's Department

SUBJECT: Council Boards, Committees, & Commissions

Appointments

BACKGROUND:

City Council Members serve on a variety of outside Boards, Committees and Commissions. City Council Policy No. 2 ("Policy" – Attachment 1) establishes guidelines for the City Council to appoint Council Members to share in the Council's representation on these outside agencies. The Policy states that appointments will be made for two-year terms, unless otherwise stated by the Boards/Commissions/Committee, resulting in a biennial review to address expiring terms and changes in membership due to an election/appointment. However, this Policy does not prevent Council from making changes when necessary,

This Staff Report is before Council to review expiring terms and vacancies created by outgoing Council Members and establish new two-year terms for all positions, whether they are reappointments or new appointments, among the Council's Regional Boards, Committees & Commissions and Council's Standing Committees.

Regional Committee Terms

Regional committee terms may be set pursuant to their respective bylaws. The Policy states that any change of an appointee at mid-term shall complete the existing two-year term for which they are appointed.

Appointment Review

City Council historically reviews appointments annually and makes changes as needed and for the following events:

CITY COUNCIL ACTION:	

Events Triggering Appointment Review	Annually	Bi-annually
Elected Mayor: City Selection Committee appointment	х	
Agencies requiring annual confirmation of appointees (new, re-appointed, or no changes) i.e. SANDAG	х	
Reviewing any potential conflicts, changes in Councilmember schedules, or the desire to change current appointments.	х	
Term Expirations: Regional and Council Standing Committees (2 year terms)		х
General Election: Council reorganization of leaving and/or new members.		х

DISCUSSION:

Regional Committees (Attachment 2)

Attachment 2 contains the City Council's Regional Agencies' Boards/Committees/ Commissions, which are appointed by Council. With the exception of the City Selection Committee, all Regional Boards/Committees/Commissions have a two-year term. Appointments were last made to these groups in January 2019, following the 2018 general election, and then reviewed in January 2020 with no changes, due to vacancies and appointed Council Members. The Regional chart has been modified with each organization's updates following an annual verification process, which was completed prior to this report.

City Selection Committee

The City Selection Committee generally meets once a year but may meet as often as needed. This Committee is responsible for the appointment of area city members to the San Diego County Regional Airport Authority (SDCRAA) and is also responsible for the nomination, selection and appointment of a city representative to a city office on the San Diego Local Agency Formation Commission (LAFCO).

The City Selection Committee assumes that the Mayor of a city is the appointee. However, in the past the City's Mayor has not always taken on the appointment since the meetings take place before or after the League of California Cities Board meeting or sometimes SANDAG meetings, and instead appointed one of the members of those agencies for the convenience of attending both meetings. Now that Solana Beach has an elected Mayor, the Mayor will want to consider whether she would like to be the appointee. While the City Selection Committee typically assumes a city's Mayor will be their appointee, their bylaws allow for any member of the body to be appointed along with notification of alternates. Therefore, this designation should be examined for a determination at each new term.

Stipend/Compensated Appointment Positions (identified on Attachment 2)

Certain agencies' bylaws provide for a stipend paid for each meeting's attendees. Appointments made by a governing body of elected or appointed members to serve as an officer of a board for additional pay requires disclosure when the nominated member participates in the vote for their own appointment. Subsequently, pursuant to Fair Political Practices Commission (FPPC) Regulation 18705.5, appointments providing additional compensation or a stipend of \$250 or more, within a 12-month period, must be disclosed on the Form 806 (Agency Report of Public Official Appointments). The City complies with the requirements of the Form 806, which is monitored, updated, and posted by the City Clerk, including making updates promptly when triggered. This procedure allows the governing body to operate with the entire body present, rather than members recusing their participation for each individual appointment, which could risk the presence of a quorum needed to complete the appointment process.

Standing Committees (Attachment 3)

Council Standing Committee appointments are two-year expiring terms so new appointments or re-appointments are required at this time. The current appointments were made in January 2019. Therefore, all appointments should be reviewed for reappointments or new appointments.

All appointments to these Boards/Commissions/Committees must be approved by a Council majority vote. It is recommended that appointments be made for each of the 2 different groups (Regional and Standing). However, procedures for making the appointments within these groups may be made all in one vote (unless recusals are enacted) or votes may be taken on each individual Board/Commission/Committee, as well as each individual appointment position. Either way the motion, motioners and votes should be clearly communicated for the record.
